ATI CLOUD – TRANSFORM YOUR IT INFRASTRUCTURE

ENABLE EASY AND SECURE FILE SHARING AND ACCESS WITH ATI CLOUD DRIVE

With an increasing demand for document and file sharing among employees or with external partners, airlines must determine the best way to maintain control over data and access. SITA's ATI Cloud Drive allows you to simplify and improve existing business processes based on technology that users want, resulting in more motivated and empowered employees and partners.

ISSUES

Data communication

Lack of quick and reliable means of content distribution to support business processes and operations.

A multi-device world

As employees begin to use more new devices, organizations must determine how they will provide seamless access to corporate data across the spectrum of devices, including BYOD.

Security and control

As a result of the increase in consumer-grade sync and sharing solutions, a huge black hole has been created when it comes to protecting and controlling corporate data.

SITA SOLUTION

The SITA ATI Cloud Drive provides instant file and document synchronization across desktops, laptops, and mobile devices. Distributing marketing documents, submitting report files for crew, and synchronizing electronic flight bags for pilots are just a few areas in which ATI Cloud Drive can dramatically improve business processes.

- The Community Edition provides facilities for smaller communities who share data on an occasional basis.

- The Private Edition provides enhanced functionality such as Active Directory integration, file encryption and advanced security, access policies, and collaboration services.

BENEFITS

- Automatic data backup of hosted documents and files

- Private storage area for service hosting located in the nearest ATI Cloud data center

- Integrated with customer's private virtual data center and applications

- Active Directory integration and strong authentication services (optional)

- User administration and privileges management

- Supported by SITA Desktop-as-a-Service as a published
