eHealth Week welcomes stakeholders from across the globe to address international hot topics related to health-care IT, including “Cross-border exchange of personal health data: from policy to practice”, “European Reference Networks: how digital health helps”, “Ageing well with eHealth: New initiatives and policy”, “Women in Health IT” and much more.

The event is organised by the Maltese Ministry for Health as part of their Presidency of the Council of the European Union, the European Commission, and HIMSS Europe. The conference is organised in collaboration with the World Health Organization, Regional Office for Europe (WHO/Europe) and HIMSS-CHIME International.

eHealth Week is the perfect context for policy-makers, industry representatives and practitioners to meet and exchange perspectives. HIMSS-CHIME International and

ECHAlliance invite you to set up a stand at the EU Project Pavilion and join a network of various stakeholders in showcasing how EU funded projects and cross-border cooperation have led to the scaling up of innovation and the sustainable transformation of European healthcare.
