Welcome Letter

The cultural journey never ends, it only has resting places, stopovers where the traveler can look around and collect his thoughts.

This is the motto of this the XXIV European Congress of Perinatal Medicine.

We consider you all cultural travelers, your bags filled with perinatal sciences, and now you have arrived in Florence where for three days we will all exchange ideas and provide answers to the professional complexities that exist in promoting the health of mother, fetus and newborn.

Our work, which is becoming increasingly more intense, calls for greater awareness and responsibility in clinical, deontological and ethical terms.

The “ECPM-2014” has been set up as a sort of large, temporary laboratory, an authority on perinatal culture that organizes and coordinates the available scientific resources and fosters relationships among single delegates, while also opening the way for programming alliances with national scientific societies.

Together with the Board, the Scientific Committee and the Educational Committee of the EAPM, we have taken steps to create perinatal thinking tanks that can be filled with the multiplicities of our knowledge.

This will be the site of widespread confrontation where we can personally address pressing topics, advance powerful ideas, and give birth to creative know-how.

The various panels we have organized will deal with the most current topics of perinatal science. Each panel will consist of world-famous speakers, experts in their respective fields, who will address major topics and related issues, giving you the change to explore the various terrains of perinatal science.

The rooms of the conference venue - Palazzo dei Congressi - are named after several prestigious Florentine women and men, demonstrating how Florence is the “ideal cradle” for enjoying this conference, a privileged stopover where you can look around and collect your thoughts......before taking off again on your cultural journeys.

Thank you all for taking part in this congress
