

FIRST ANNUAL
COCIR eHEALTH SUMMIT BRUSSELS
18-19 November 2014

How eHealth Can Drive Clinical and Financial Outcomes

COCIR
SUSTAINABLE COMPETENCE IN ADVANCING HEALTHCARE

European Coordination Committee of the Radiological, Electromedical and Healthcare IT Industry

COCIR HOSTS SUCCESSFUL FIRST ANNUAL eHEALTH SUMMIT

Focusing on clinical and financial benefits, the first Annual COCIR eHealth Summit took place on 18-19 November 2014 in Brussels, Belgium in partnership with HIMSS Europe and the European Hospital and Healthcare Federation (HOPE). In an era of integrated care, it is increasingly important to invest in eHealth. COCIR's eHealth Summit was a great space to share concrete best practices. The event saw four sessions on:

- Digital hospitals
- Regional and national electronic health records
- Big data
- mHealth

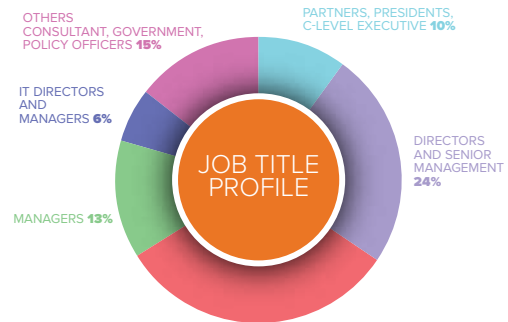

Each session saw diverse stakeholder perspectives including industry, users and national/regional authorities. We were delighted to also have a diabetic patient perspective to better understand the realities and how mHealth helped his daily life.

Nicole Denjoy, COCIR Secretary General, said "COCIR is delighted to have brought together key stakeholders at our first eHealth summit. The broad range of participants and varied discussions demonstrated the event's success. COCIR will continue to be the leading health ICT industry voice and work together with healthcare providers, patients, regulators and EU institutions."

34% of Attendees Were Senior Management
