OVERVIEW

The first BMT Tandem Meetings were held in 1995. Because of a significant overlap in constituency, the CIBMTR and the ASBMT combined their annual meetings to allow participants to optimize time and travel funds by attending two meetings in a single week. By combining the meetings, over 3,200 participants are expected, with approximately 20% from outside the United States. Historically, about 50% of attendees are physicians (MDs) and researchers (PhDs), 21% nurses, 11% advanced practice professionals, 10% clinical data coordinators, and 8% pharmacists.

The BMT Tandem Meetings will include scientific sessions, poster sessions, symposia and workshops on a wide variety of current issues in allogeneic and autologous transplants, including parallel conferences for advanced practice professionals, transplant nurses, BMT clinical research associates, BMT pharmacists, BMT administrators, as well as special sessions for pediatric physicians, medical directors and fellows-in-training.
EDUCATIONAL CREDIT

Continuing Medical Education (CME) for physicians and contact hours for allied health professionals will be provided by the Medical College of Wisconsin. Nursing and pharmacy credits will also be available for some of the sessions.

EDUCATIONAL OBJECTIVES

Upon completion of this CME activity, participants should be able to:

- Report on the state of the art in cellular therapy and blood and marrow transplantation;
- Analyze new methods and controversial issues in clinical management strategies for reducing toxicity and improving transplant outcomes;
- Assess new basic science information in the areas of immunogenetics, molecular biology, stem cell biology and immunology as it relates to hematopoietic stem cell transplantation;
- Review CIBMTR research accomplishments and set the scientific agenda for next year;
- Review accomplishments of ASBMT, including progress on organizational, societal and regulatory issues in blood and marrow transplantation;
- Report on contemporary principles in BMT nursing, pharmacy, data management, clinical research analysis, pediatric transplantation and transplant center administration.
