John spend the first 17 years of his career at Peach Bottom Atomic Power Station holding positions in I&C Engineering, Fire Protection, Licensing, Contract Management and Project Management. In 2001, John moved into a corporate role holding positions in Supply Analytics, Decision Support, and most recently, Manager of Inventory and Investment Recovery.

**Abstract – Utility Supply Chain Analytics**

This benchmarking session is to discuss the types analytics used by Supply to manage day to day business activities. Discussion topics will include: What types of supply chain analytics are available? What department is responsible for managing and maintaining the analytics (Supply or IT)? Who in Supply has access to analytics? Who and how easily can ad-hoc reports be created? This benchmarking session will highlight best practices and help to develop new ideas to improve Supply Chain Analytics.
