

# ITaaS

Data Center Inc, Stays Ahead of the IT Infrastructure Curve with Cloud-based Storage Solution

Robert R. Ross, CSO, SVP Network/Technical Services

# Data Center Inc. (DCI)

- Industry: Financial Services (Core Processor) 46 years
- Headquarters in Hutchinson, KS
  - 250 FTE's
- Provides full-service bank technology and processing solutions to the financial industry
- 200 Financial Institutions serviced "Coast to Coast"
- iCore bank processing system....soon to be named iCore360
- Imaging, internet banking, networking, teller automation, ATM/Card services, backroom services. Voice response, mobile banking
- Solutions enable banks to obtain core processing proceedings (ATMs, debit cards, etc.) without the hardware/software/IT staff issues

# Technology Environment

- Technology Landscape:
  - HP Servers (ESX)
  - SUN Servers (Oracle)
  - NetApp SAN Systems/Software
  - Cisco Switch and Router Products
  - VMware
  - Oracle
  - Verizon
  - Microsoft

# Corporate Objectives

- Storage for server consolidation project
- Improved efficiency
- Enhanced disaster recovery for regulatory compliance
- Business continuity
- File sharing
- Better growth management – space, power, cooling
- Flexibility for delivering IT as a Service (ITaaS)
- Build a solid physical infrastructure (no cobbling)
- Move to a “computing utility” structure for banking
- To enable provisioning and scaling of hardware non-disruptively
- Ability to manage growth without disruption

# Solutions and Benefits

- Business Challenge
  - Implement storage for server consolidation project to improve efficiency, DR, and business continuity
  - Achieve flexibility for delivering IT as a service (ITaaS)
  - Ability to manage growth without disruption
- Solution
  - SAN storage systems
  - Server Virtualization
  - Deduplication, Mirror, and Restore technologies, Manager for Database, Manager for email , Manager for SQL , Manager for Virtual Infrastructure, SAN Operations Manager, and SAN Enterprise software
  - Management tools
- Benefits
  - Enabled automated DR within minutes, at half the cost
  - Saved >\$125K in annual power and cooling costs
  - Managed >100TB of storage with 1 FTE
  - Manage 5 VM data centers with 1 FTE
  - Reduced data center footprint by >75%

# DCI Private Cloud Topology

(current delivery)

## A quote a year ago:

- “Putting this technology in place has helped us instantly **add functionality**, generate **immediate savings**, and simultaneously establish the foundation for **delivering expanded cloud-based services.**” - *Robert Ross, DCI*

# Conquering Time and Labor

- Virtual Server Management
- Workload/Performance Management
- Maximize Technician capabilities and cost
- Leverage reputable/ competent consultants
- Lights out management/operations
- Around-the-clock-services
- Comprehensive information protection
- Rely on DCI for innovative solutions to help banks to stay competitive
- *“It became increasingly labor intensive to protect rapidly expanding volumes of mission-critical financial data,”*

• *Robert Ross. DCI*

# Product Development/Offerings

- Single repository of regulatory controlled data
- Online Storage retention of all data for full 7 years
  - Customer Statements
  - Customer Transaction Data
  - Full Check Images
  - Full loan documentation/work papers
  - Customer information
- Replication and archive of all regulatory data
- Data warehouse services
- Private Cloud connectivity for over 8,000 users

# Development/Testing/ Stress/Modeling

- What this infrastructure has enabled:
  - Flexibility to build and configure custom environments
  - Ability to tune during stress/modeling
  - Minimal Staff requirements
  - Quick turnaround
  - Enablement of “Sandbox” deployment
    - Mirroring of Production
    - Quick Transition
- Product development has taken on a new “dimension” of capability and creativity.
- Product possibilities are becoming virtually endless.

# Service Deployment of new products

- Transparent Migration
- Quick Timeframe
- Transparency
- Instant “replication” and “recovery”
- Quick Performance Management/Tuning
- *(spend more time documenting than deployment)*

# Other Tangible Benefits

- Anticipate 70% reduction in energy costs
- 160% ROI
- Thin Provisioning
- Deduplication
- Control of FTE Support
- Release management in production environment
- All contribute to the bottom line
  - “DCI profits in 2009 were largest in 45 years”
  - “Same expectation in 2010”

# Future Benefits?\*#\\$

- Improved customer support capabilities
- Bundled Pricing for Banking
- Quick Onboarding of new Banks
- Full Web Services/Access
- Unprecedented “denovo” start up cost competition
- Maintain agility/flexibility- our “heritage”
- Continuum of Banking in a disaster
- Become the future “Boogle” of banking (*if you know what I mean*)
