

POSTER #32 - North America's Leading All-In-One Long Term Care Technology Solution

Jonathan Seliger

InTouchLink, Courtice, ON, Canada.

DESCRIPTION:

InTouchLink provides senior living communities with the tools to increase communication with residents, families and stakeholders, train their staff efficiently and effectively and encourage residents to use technology easily and simply.

The results of our research enabled ITL to forge a new direction – create an all-in-one communication tool and make it simple. The in-lobby and in-room communication channel allows residents and families to stay connected with home updates and current events. In addition, the communication channel delivers emergency announcements, program information, builds awareness for incoming vendors (such as the pharmacist) and allows families to connect remotely.
