Fall 2015 EQ Technical Conference Nuclear Utility Group on Equipment Qualification November 4-6, 2015 Clearwater, Florida

> William Horin, Winston & Strawn, LLP (<u>whorin@winston.com</u>) Ronald Wise, NEQ Consulting (ronwise@aol.com)

• Preparation for the inspection is crucial to success

- Initial inspection success important for each Region
- Several elements of pre-inspection preparation can be supported by the Group

- NEI CDBI Committee
  - Participate with regard to EQ Pilot Inspection Subgroup
  - Provided to NEI/All Pilots Material Regarding OE for Inspection Preparation
    - Enforcement Activity
    - ▲ Part 21's
    - Licensee Event Reports

- Pre-inspection recommendations regarding plant-specific preparations, including program guidance documentation. For example:
  - Self-assessment, including walkdowns, cable inspection (review plan drafts and objectives, review results)
  - Preparation of licensing basis description documents (EQ and HELB)
  - Compliance matrix
  - Program synopsis (procedures, upgrade status, INPO EPG-2 integration, conformance with 10 elements of X.E1 of GALL, etc.)
  - Reference books for inspection team (key procedures, CLB descriptions, other program implementation topics)

Pre-inspection recommendations for licensee support of plant-specific inspections. For example:

- Inspection support team identification
- Assignment of roles
- External inspection support concurrent with inspection (peer support)
- Pre-inspection generic positions for use by pilot plants, generic guidance to plants. For example:
  - Service life v qualified life v shelf life
  - Consideration of hot spots or locally adverse conditions
  - License renewal or other plant change incorporation (AST, power uprates, GSI-191, 24 month cycles) implementation

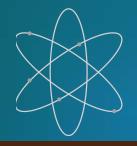

- Pre-inspection recommendations for self-assessment areas for review (depends on final procedure to some extent). For example:
  - Backlog
  - Vendor interfaces
  - Uses of sound reasons
  - Health Report results
  - Confirm equipment list
  - CAP for EQ-related items for last several (3) years
  - Open Operability Determinations that have implications on EQ Program or impact any EQ equipment
  - OE that has been addressed or incorporated by EQ in last 3 years
  - Training and qualification of plant personnel regarding EQ

• Group support during inspections

"Live" support, phone/email

Onsite support (Group members (peers), others)

- Post-inspection support for result communications
  - NRC findings
  - Observations regarding NRC conduct
  - Pilot debriefing with other pilots (pilot web briefing)
