

BOOTH # 4 – BrainFx

BrainFx 360 - An Innovative Tablet Based Clinical Assessment Tool - BrainFx 360

Assessment is a new, research-based, web and tablet based clinical assessment tool delivered by health professionals that can be used with seniors in various care settings. The assessment is specifically designed to measure the effects of mild to moderate brain disorders and can be used for a baselines and comparisons and can track functional outcomes over time. It provides a comprehensive profile a person's neurofunction, which includes cognition, mood, behaviour, balance, sleep, nutrition, activities of daily life, quality of life and more. Because of the integration of technology, it is efficient and cost effective and the report is immediate and actionable.
