

7 The Cube is Dead

MINISTRY OF SOCIAL
DEVELOPMENT
TE MANATŪ WHAKAHIATO ORA

Michael O'Neil, Manager Data Warehouse

We help New Zealanders to help themselves to be safe, strong and independent
Ko ta mātou he whakamana tangata kia tū haumarū, kia tū kaha, kia tū motuhake

February 2014

Introduction and Motivation

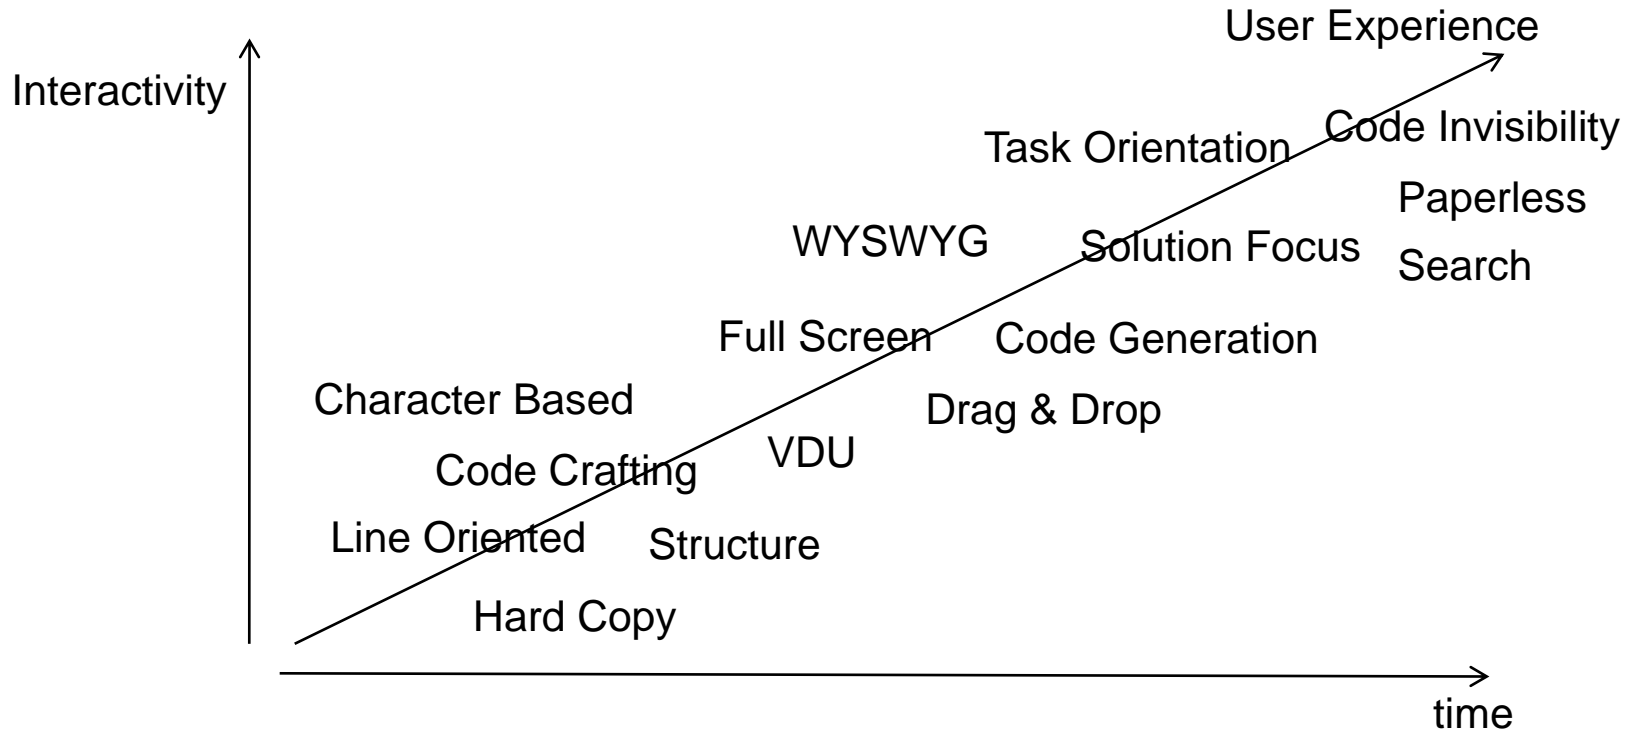

➤ Exploring Trends

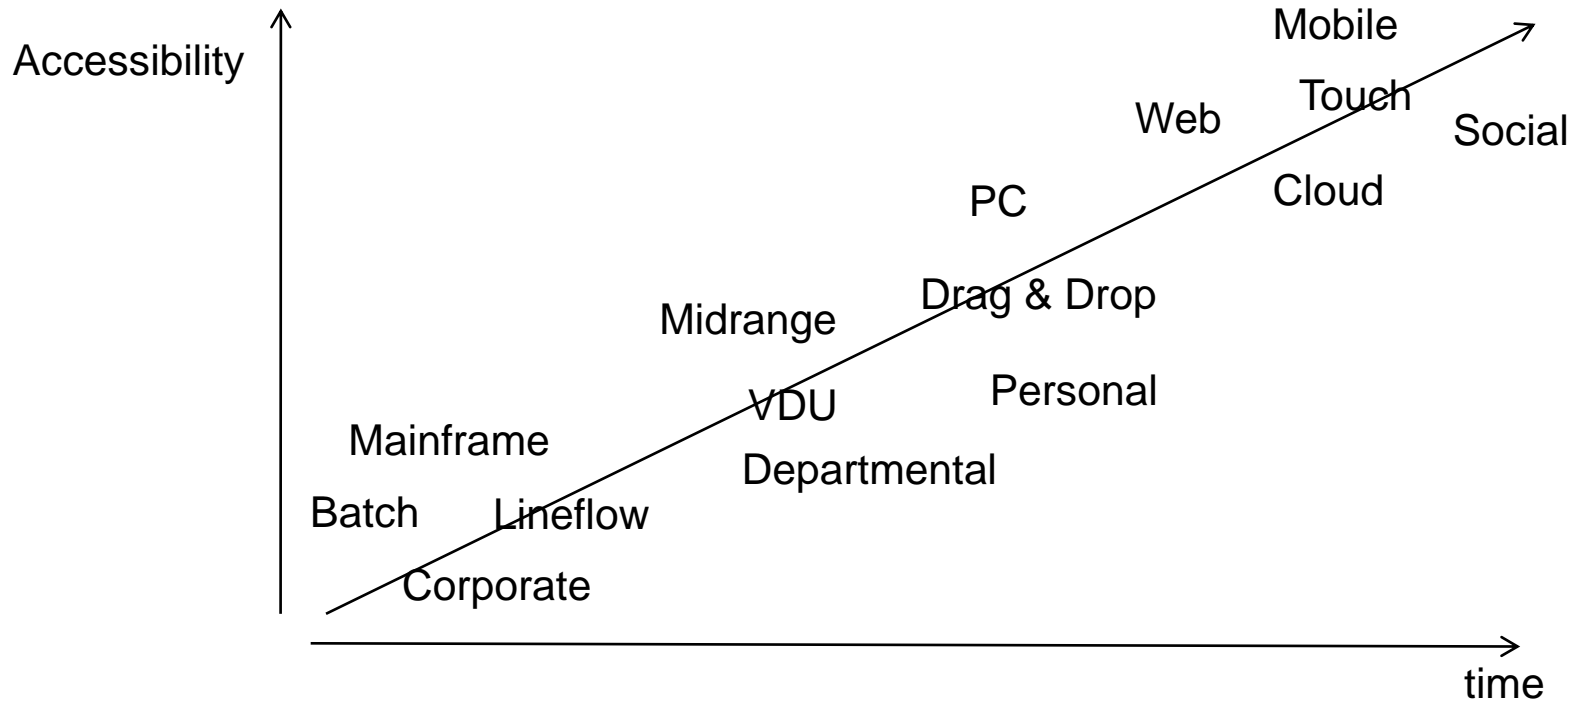

- Key Trends and Their Significance
- Game Changers
- Ubiquity

Trends – 1 Interactivity

➤ Trends – 2 Accessibility

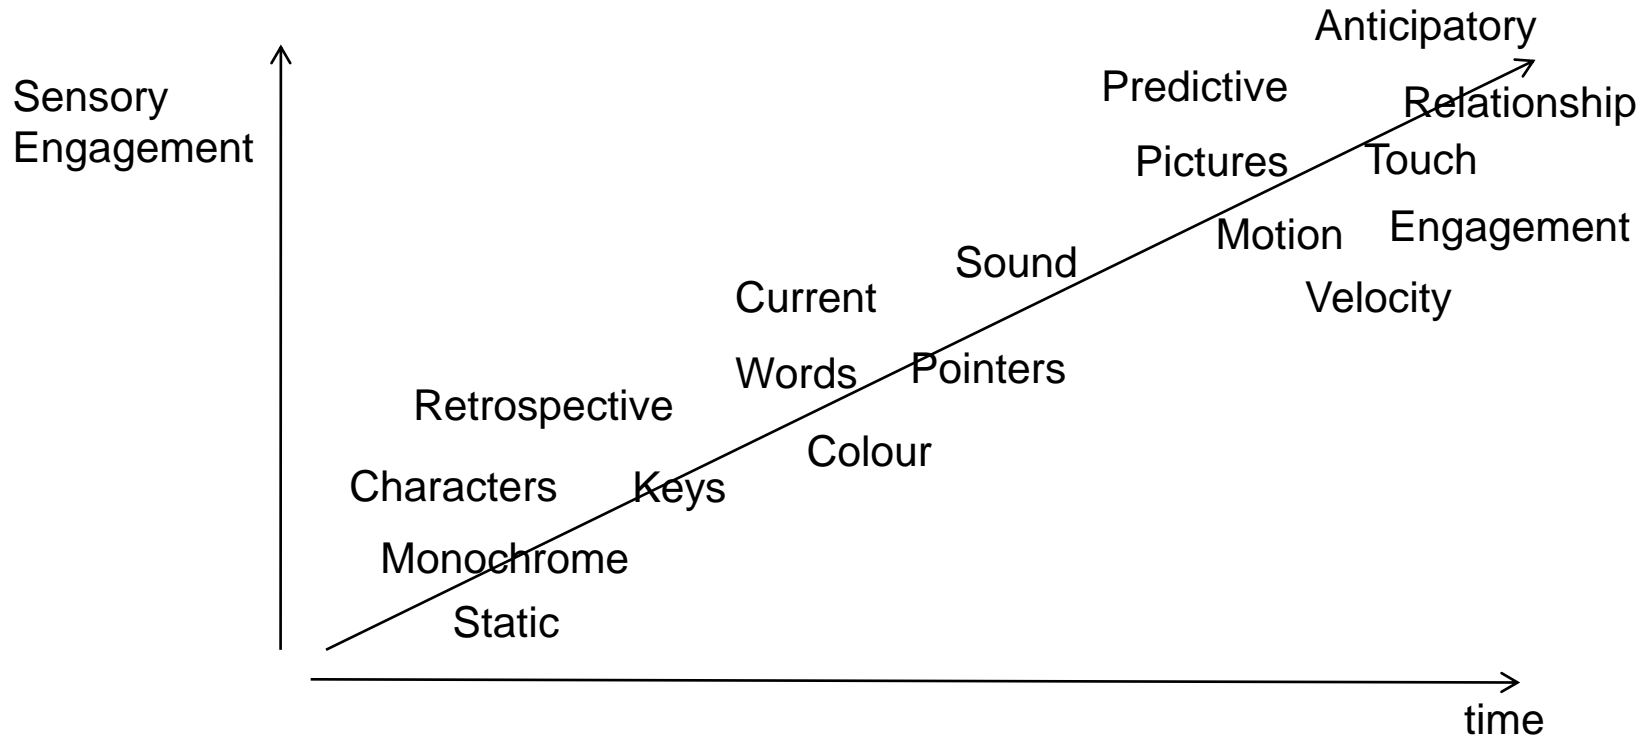

Trends – 3 Structure Irrelevance

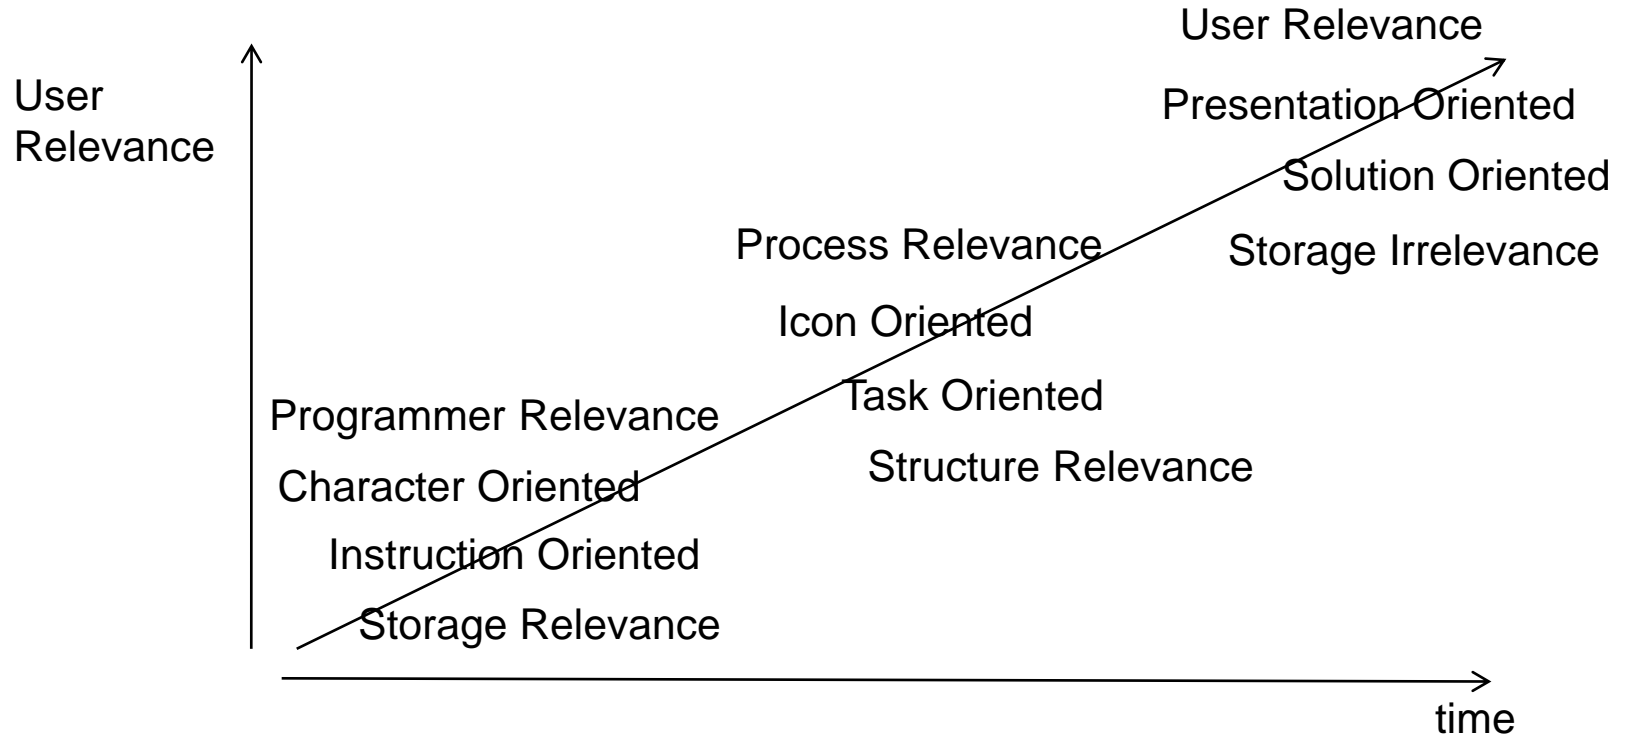

➤ Trends – 4 Sensory Engagement

Trends – 5 User Relevance

➤ Game Changers - Interactivity

- Google
- Amazon
- Search
- Offer Presentation

➤ Game Changers - Accessibility

- PC (emergence of the Personal Device)
- Internet (is it the Browser)
- Internet (is it “social”)
- Internet (or is it P2P)

Game Changers - Structure

- Visicalc
- Excel
- Spread Sheet (data as a table)
- Spread Sheet (data as a cube)
- Spread Sheet (data you interact with)

Game Changers - Sensory

- Mouse
- Pointer
- Drag & Drop
- Instruction Reduction

Game Changers - User

- Icon
- Visual Cue
- Branding
- Command Hiding
- Enabler

Ubiquity

- What Drives Ubiquity?
- Examples

Ubiquity – Spread Sheet

Invoice

Line
Line

2014				
2013				
2012				
	Col	Col	Col	
	Row			
	Row			
	Row			Total

➤ Ubiquity – Spread Sheet

- The Spread Sheet emerges to solve a problem
- Speed, Interactivity, Responsiveness
- 3D Interactive Calculator

- The Spread Sheet (not Excel) is Ubiquitous

➤ Ubiquity – Smart Phone (?)

**Pheidippides
(Marathon)**

**Native American
(Smoke Signals)**

**Morse
(Telegraph)**

The Digital Swiss Army Knife

Phone, Camera, txt, GPS,
Browser, Audio, Video,
Torch, Payments, Alarm,
(bring on the on-board laser so
I can cut something)

➤ Ubiquity – Smart Phone (?)

- The smart phone is the response to a desire for convergence of a large array of personal devices onto a single device
- Accessibility, Mobility, Affordability
- The Digital Swiss Army Knife (not iPhone) is Ubiquitous

➤ Ubiquity – What Drives It?

- The Spread Sheet is a simple accessible tool for presenting multidimensional data with basic calculations to reduce dimensionality and present information.
- Market Size is large. Even one-person businesses need to keep track of how they are doing
- Deployment execution by the Vendor

➤ Ubiquity – What Drives It?

- The Smart Hand-Held Device is a platform for the convergence of P2P transactions.
- Market Size is huge. See “Black Hawk Down”.
- The UI hides complexity from the user.
- “Appnology”

➤ Ubiquity – What Drives It?

- The VA platform is one response to the need for multi-dimensional exploration and Insight Discovery in a large scale data environment, where data organisation and preparation effort distracts from the goal of speed to market and ROI
- Decouples the presentation and navigation UI from the data storage / organisation and Analytics Engine

➤ Ubiquity – What Drives It?

- The human brain drive to extract and access Signal amongst the Noise
- Lists, groups, tables, graphs, drill, navigation, aggregation, summarisation, - anything that makes it easier

➤ Ubiquity – What Drives It?

- The “Cube” is a conceptual aid for organising data across multiple dimensions
- The “Cube” is a technical implementation using pre-summarisation and storage of dimensional aggregates for speed of retrieval

Relevance to MSD – Current State

- Business Silos
- Information Silos
- Application Legacy
- Application Focus
- Process Focus
- Managing Technical Debt

➤ Relevance to MSD – Future State

- One MSD
- Information Sharing
- Application Retirement
- Information Focus
- Client Outcome Focus
- Managing Resources and Talent

➤ Relevance to MSD – VA

- Simplification of Insight Discovery Data Preparation
- Disintermediation of Data Experts (less reliance)
- Technical Debt Reduction (maintenance / upgrade)
- Step Change in move to Mobility
- Release of CPU cycles to higher ROI activity
- Shifts Insight Discovery to the Visual Domain

➤ VA - Convergence

- Interactivity (Hides code and data manipulation)
- Accessibility (Web, Mobile, Analyst, Consumer)
- Structure Irrelevance (Big, Fat, Wide, Deep)
- Sensory Engagement (Visual)
- User Relevance (Configurable for Role)

➤ The Cube Is Dead

- The technical implementation of the “Cube” is Dead
- VA represents a Convergence of computing power (IO performance and CPU performance) , flexibility and adaptability in data navigation, Interactive usability and sensory engagement, with accessibility via Browser and Mobile devices
- A Game Changer? Ubiquity?
