

# Enterprise AnyWare – Infrastructure Flexibility Meets Manageability

**Kris Bondi**

Vice President, Marketing  
Moka5

# Today's Enterprise

Standardization no longer exists

- Heterogeneous clients
- Heterogeneous workforce
- Heterogeneous operation
- Heterogeneous management infrastructures

# How Does IT Respond?

Traditional Management - On-prem only?

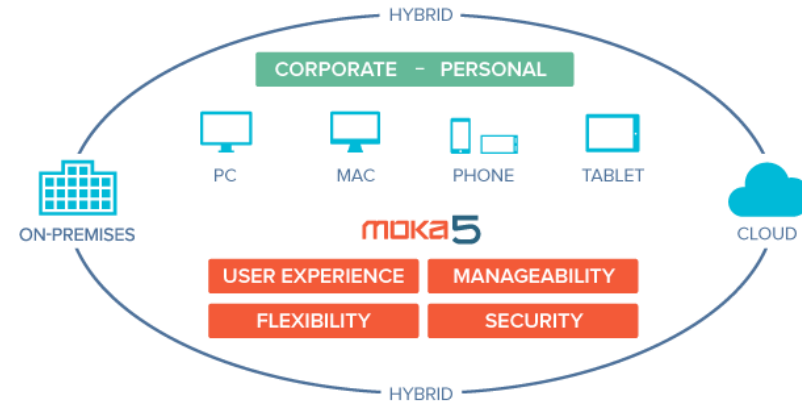

- Ø Fast
- Ø Flexible
- Ø Inexpensive
- Ø User-friendly

Cloud only?

Doesn't consider:

- Data center investment
- Compliance & policies
- Bias against everything in cloud

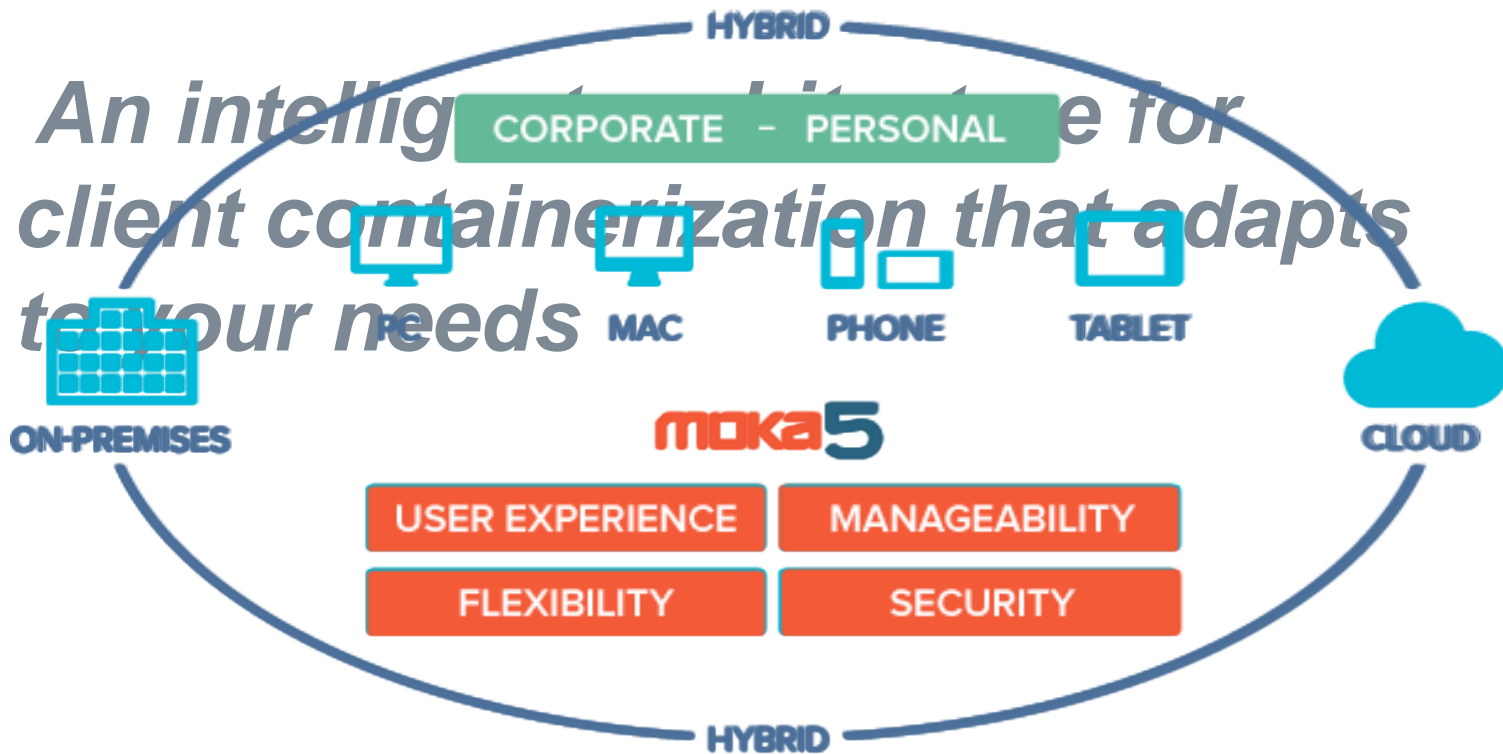

The Answer:

**moka5**  
Enterprise AnyWare

# moka5

Enterprise AnyWare

# A Likely Hybrid Scenario...

- Moka5 Enterprise AnyWare enables:
- Widest range of deployment options for client-side container management, on-prem, cloud, or anywhere in between
  - Adding new computing assets without disrupting your existing infrastructure
  - Centrally managing all users from one console
