

Jimmie L Hammontree

Jimmie L Hammontree is Manager of Environmental & Regulatory Affairs for Oklahoma, Arkansas, Kansas, and the Texas panhandle. His primary responsibilities include tracking changes in state and federal regulations that affect the company's operations, working with agencies and industry groups to affect positive changes in regulations, and providing public education about Chesapeake's operations and environmental practices. In a previous position, he managed environmental due diligence on real property, oil and gas asset, joint venture, and volumetric production payment transactions for Chesapeake. In this role Mr. Hammontree's responsibilities also included oversight of site assessment, cleanup, and Brownfield initiatives for the company's non-producing real estate assets.

Prior to joining Chesapeake Energy, Jimmie served as the City of Oklahoma City's Brownfields Coordinator where he developed, implemented, and managed the Brownfields Redevelopment Program, overseeing all aspects of the City's Brownfields Cleanup Revolving Loan Fund program, Brownfields site assessment program, and Superfund reuse planning initiative. Mr. Hammontree also worked in the environmental consulting field for eight years specializing in Department of Defense and industrial property environmental due diligence studies and National Environmental Policy Act (NEPA) impact assessments.

Mr. Hammontree has more than 15 years experience as an environmental professional serving in industry, local government, and consulting and holds a B.S. in Environmental Design from the University of Oklahoma.
