

Dr. Ian A. Webster is Founder and President of Project Navigator, Ltd. (PNL), a nationwide environmental engineering and project management firm with specialty expertise in the closure of landfill sites. Since 2009, PNL has operated a photovoltaic solar power project development firm called PV Navigator, LLC. PVN's business focus is the development of MW-scale, fixed tilt, rack mounted PV power systems on the caps of closed landfill sites. Landfill sites are an excellent siting location for 2 to 5 MW systems. More can be found at [www.PVNavigator.com](http://www.PVNavigator.com). PVN has about 30MW of project capacity moving through the development pipeline in California and the Northeast.
