In neonatology for life

Dear Colleagues, Dear Friends,

The 1st Congress of joint European Neonatal Societies (jENS 2015) promises to be a unique event in the field of neonatology, serving as a hub for the wealth of knowledge amassed by four leading societies in the field of neonatology. The European Society for Paediatric Research (ESPR), the European Society for Neonatology (ESN), the Union of European Neonatal and Perinatal Societies (EUNPS) and the European Foundation for the Care of Newborn Infants (EFCNI) have all decided to combine their efforts to establish a joint meeting that will cover a wide range of topics in neonatology, ranging from state-of-the-art basic and clinical research to patient-centred care and clinical guidelines, in an unprecedented initiative.

During this event, neonatologists and neonatal care professionals from around the world will gain unparalleled access to the best scientific research and clinical care programmes available. Attendees from all levels of neonatal care are welcome. A panel of more than 120 leading international experts who have personally contributed to the state of the art will review cutting-edge developments in the areas of neonatal care and research, which are particularly active today.

Networking and interactivity between the principal players - participants, KOLs, industry and the Organizing societies - will be the keywords of this congress. Innovative and interactive tools such as specially designed apps, jENS TV, interactive e-posters, interactive communications between speakers and the audience and much more will make this congress a truly pioneering experience.

For this 1st meeting, the jENS comes to Central Europe. The host city, Budapest in Hungary, can be counted among the most famous ancient European cities, with a history dating back to the 1st century. It is a Central European jewel impregnated with history, combining spectacular buildings, incredible charm, and a true touch of romance. It certainly deserves a visit and will without a doubt become one of the congress locations that live on in memory.

In the name of the entire jENS organizing committee, I would like to cordially invite you to join us in Budapest, and through your active participation, either as presenters in the scientific program or just as active participants in the discussions, make the 1st jENS meeting a resounding success.

See you all in Budapest in September 2015!
