

POSTER #30 - A music-based, custom-built sound therapy for treating tinnitus (ringing in the ears)

Shelly-Anne Li¹, Michael Chrostowski²

¹Sound Options Tinnitus Treatments, Toronto, ON, Canada, ²McMaster University, Hamilton, ON, Canada.

DESCRIPTION:

Imagine treating tinnitus (ringing in the ears) was as easy as listening to music. Sound Options Tinnitus Treatments (SOTT) realizes this possibility. SOTT produces music-based sound therapy for tinnitus that can be delivered using any music playing device. The therapy is custom-built according to the patient's audiogram and tinnitus profile which are obtained within 15 to 20 minutes and sent from his or her hearing clinic using Sound Options' proprietary web-based tool.
