Biography

Mr. Morris brings more than 25 years of business and project management experience; 10 of which in the nuclear industry where he managed projects in EQ, software development, Seismic Qualification, recruiting, business development, and strategic issues. He is a very versatile manager and has extensive leadership experience managing large teams in the nuclear industry, at NASA Headquarters, and as a small business owner. Keenly aware of critical path and budgeting constraints, Mr. Morris remains focused on meeting deadlines and efficiently managing project budgets to avoid production delays and/or cost overruns. His business acumen makes him the ideal choice for managing projects to ensure all milestones are met on time and client requirements are satisfied.

Abstract – Speed Networking Session

The Speed Networking Session provides a structured time to meet with the industry professionals with whom you do business. This session is divided into eight time slots during which you will be able to interact with suppliers and service providers (if you are a utility) or utility customers (if you are a supplier). This is a closed session is for RAPID Members only.
