# Sagittal First: A New Era in Facially Driven Orthodontic Excellence

## Achieving Complete Facial, Skeletal and Dental Harmony in Class II & Class III treatments, WITH THE CARRIERE® MOTION 3D™ CLASS II & CLASS III APPLIANCE AND SELF LIGATING BRACKET SYSTEM

### COURSE DESCRIPTION

#### LECTURE FORMAT

- Dr Carriere will show how correcting a Class II and Class III malocclusions, and then transitioning to a Passive Self-Ligating Bracket system, provides treatment efficiencies over traditional mechanics. Addressing the patient’s sagittal dimension FIRST to establish a Class I platform simplifies, shortens and standardizes treatment. Patient compliance is also maximized when the anterior – posterior discrepancy is corrected at the beginning of treatment.

This new Sagittal First approach ensures that the practitioner addresses the total facial harmony of the patient. Dr Carriere will also review soft tissue analysis and how to ensure long term treatment results which benefits patients as they age.

Upon completion of this course participants will:

- Understand the efficiencies of the Sagittal First Philosophy and how it benefits patients and provide stable long-term treatment results.
- Learn the efficiencies of correcting Class II and Class III malocclusions at the beginning of treatment
- Understand how to use harmonious forces resulting in minimal extractions
- Have a better understanding of soft tissue analysis as patients age
- Recognize the long-term health benefits of airway friendly orthodontics

In this presentation you will discover many of the innovative features of the Carriere SLX Bracket System. All designed to meet your ultimate goals in:

- 1) effective case management.
- 2) optimal tooth positioning.
- 3) meticulous case finishes.

#### 3 LEARNING OBJECTIVES

1. Learn how to control distalization with predictability.
2. Learn how to accomplish a solid Class I posterior platform in Class II and Class III cases.
3. Learn how to simplify and optimize the orthodontic procedure and at the same time reduce the treatment period.
