- Fermi's Obsolescence Program Manager,
- USA/STARS Procurement Engineering and Obsolescence Task Team Chairman,
- RAPID Steering Committee Member and
- Nuclear Utility Obsolescence Group (NUOG) Chairman

Abstract for Monday AM Session

This year's Technical Session will provide timely updates from some of the most active Industry Organization in our area of expertise. In addition, there will be critical industry information communicated to the group in the areas of EPA Regulations, Inventory Cost Management, Improving Sourcing Times and Cost, and Procurement Issues for New Builds. This track will be both interesting and critical to today's impacts on Supply Chain and the Procurement Engineering organizations and will provide excellent Benchmarking opportunities.
