RISING TO NEW GLOBAL DEMANDS IN CARGO OPERATIONS: SAFETY, SECURITY & EFFICIENCY IN THE AGE OF SCALE

Dear cargo industry colleagues,

How can stakeholders along the maritime supply chain maintain – and indeed improve – safety, security and efficiency in the face of rapidly escalating ship sizes and greater concentrations of cargo, both at sea and on land?

What must be done – individually and collectively – to address the new operational demands created by the shift to ultra large containerships (ULCs) on major deep-sea trades, and the cascade of much larger vessels throughout secondary and regional markets including Africa and Latin America?

Does the continued financial pressure on global liner shipping pose a threat to delivering safer maritime supply chains?

How will the global cargo community meet the July 2016 deadline for compliance with major new IMO SOLAS legislation on container weight verification? And what must be done to address the rising risks posed by inefficiencies in cargo packing, container lashing and securing and dangerous goods management?

Do we need new approaches to emergency response, salvage and ports of refuge in light of much larger vessels and cargo concentration? And how do we deal with growing security challenges, both physical and virtual?

These are just a few of the hot topics on the agenda at ICHCA International’s 2016 conference, taking place from 29 Feb-2 March 2016 at the World Trade Centre in Barcelona, one of the Mediterranean’s major maritime cargo hubs.
Tackling the complex operational challenges now confronting cargo supply chains worldwide is a major undertaking that demands robust co-ordination between all the industry stakeholders, and between industry and regulators.

A particular regional focus for this year’s conference will be on Africa, with senior executives sharing latest views on the operational challenges and opportunities for the continent’s shipping, ports and inland logistics sectors to cope both with the big ship phenomenon and the overall evolution of Africa’s international maritime trade.

As the global NGO for cargo handling, ICHCA International is dedicated to facilitating cross-party dialogue and learning, shaping and sharing good practice, and representing our industry in key legislative efforts. We are therefore pleased to stage this international event, bringing all the interested parties together to discuss common operational challenges and map out pragmatic responses.

ICHCA International looks forward to welcoming you to the great port city of Barcelona for two days of intensive information exchange and networking with our expert panel of speakers and fellow professionals from across the global cargo community.

David Bendall, Chairman, ICHCA International

The International Cargo Handling Coordination Association (ICHCA), founded in 1952, is an independent, not-for-profit organisation dedicated to improving the safety, security, sustainability, productivity and efficiency of cargo handling and goods movement by all modes and through all phases of national and international supply chains.

ICHCA International’s privileged non-government organisation (NGO) status enables it to represent its members, and the cargo handling industry at large, in front of national and international agencies and regulatory bodies. Its Expert Panel provides technical advice and publications on a wide range of practical cargo handling issues.

ICHCA International operates through a series of autonomous national and regional chapters – including ICHCA Australia, ICHCA Japan and ICHCA Canarias/Africa (CARC) – plus Correspondence and Working Groups to provide a focal point for informing, educating, networking, shaping and sharing industry views to improve knowledge and best practice across the global cargo chain.

“The whole experience from organising to presentation was worthwhile and a good networking session. It is vital that more people are made fully aware of this legislation and that we learn to use the tools provided to offer a safer route for CTUs. Participating in seminars such as [ICHCA’s] will help encourage companies to achieve this.”
Marek Piatek, Safety and Systems Compliance Manager, Alvan Blanch Development Company

“ICHCA’s technical seminar was a real school teaching best practices in containerisation… I strongly recommend ICHCA Events to institutions in land-locked countries willing to promote containerisation.”
Rodrigue Balima, Chambre de Commerce et d’Industrie du Burkina Faso

“The CTU Packing Roadshow was covered in depth and … presented very well. A worthwhile day.”
Terry Frith, Chemical Distribution Institute

“Congratulations to ICHCA International for choosing such a common topic for all those who work in ports… thinking about a change in behaviour and [creating] a culture of prevention.”
Dippah Kayesse Théodore Roger, Cameroon National Shippers Council

“A very good impression and a high level of professionalism”
Marc Lefebvre, CMA CGM

“Always valuable to attend these events to keep up to date on industry developments and for networking”
Andrew Dearn, Maersk Line

Very well organised, good speakers offering a wide range of viewpoints on the topic”
David Groom, MSC UK

“A well organised and structured event. The meeting achieved its aims in getting the message across”
Frank Cole, NYK

“Finally someone organized a seminar where all the stakeholders were together. I really hope this will be repeated in other regions as well” Mohammed Hashas, APM Terminals

“A fantastic interactive seminar - some are too stiff but this was great”
David Crouch, Bidfreight Port Operations

“Versatility of topics was appreciated and speakers’ knowledge of their expert areas”
King Lok Chi, Hutchison Port Holdings

“Relevant to the container handling industry and down-to-earth for the practitioner.”
Chee Kit Chiang, PSA

“Good job. A well-run event as always”
Douglas Owen, Bureau International des Conteneurs (BIC)

“One of the best seminars I have ever attended”
Graham Bell, Allianz AGCS

“Well organized and interesting”
Hiroki Mukai, ClassNK

“The essential meeting point for safety and security professionals”
Jorge Martin, Noatum Ports

Pre-conference Day | Monday 29 February

13:30 PORT OF BARCELONA TOUR

As a leading Mediterranean cargo hub, the Port of Barcelona handles a wide array of containerised, bulk and ro-ro cargo. The port also provides value-added logistics service and has built a role as a strategic distribution platform for key commodities including coffee and fruit. Barcelona is also an important cruise centre. ICHCA conference attendees will have chance to tour and discuss various aspects of the port’s operations. Places are limited, if you would like to attend, please ensure you tick the box in your booking process, or email Helen Coffey: helen.coffey@ichca.com

17:00-18:00 CONFERENCE PRE-REGISTRATION OPEN

Collect your badge and conference pack early and avoid the rush on the opening morning

18:00-20:00 ICEBREAKER RECEPTION AT THE MARINA HOTEL

Exhibitors, sponsors, delegates and speakers are warmly invited to an informal icebreaker reception at Barcelona’s iconic 5* Grand Marina Hotel. Renew old acquaintances and make new contacts in advance of the conference and exhibition.

LOGISTICS: COMPARING INTERNATIONAL EXPERIENCES

Much of the operational cost and complexity of global maritime trade actually resides on land. Ensuring the safe, secure and efficient flow of goods through ports, and between ports and hinterlands, requires co-ordinated efforts – and investment – by many private and public sector stakeholders. The influx of larger vessels across multiple trade lanes is adding a new dimension to the challenge, as is the current slowdown in world trade. The afternoon session compares experiences, expectations and approaches across mature and fast-emerging regions. What common issues can be identified, and what lessons learnt?

16:15  BUILDING SMARTER, SAFER CARGO CHAINS - TECHNOLOGY & TRAINING
We close the first conference day with a look at how new technology will impact cargo operations, and what this means for skills development. How will the Internet of Things, big data, collaborative platforms, mobile, VR, gamification and automation transform the cargo world as we know it today? What are the opportunities to improve safety, security and efficiency along the cargo chain, and where are the barriers and threats? What does the fast-changing technology landscape mean for the people we need – and the way we train them?

09:00  SOLAS VGM & CONTAINER SUPPLY CHAIN SAFETY: NEW RULES, NEW REALITIES, NEW (SHARED) RESPONSIBILITIES

Industry and governments around the world are grappling with the imminent 1 July deadline for mandatory container weight verification under IMO’s amended Safety of Life at Sea (SOLAS) Convention. ICHCA was deeply involved in developing the new verified gross mass (VGM) rules and the practicalities of compliance will form a major focus of debate during the 2nd conference day.

But container weights are only part of the equation – and so, indeed, is the sea. Speakers will also cast the net wider, looking at allied issues – including container packing, securing, lashing, and dangerous goods management – that continue to erode the safety, security and efficiency of cargo operations both at sea and on land. Can the container supply chain finally unite to eradicate avoidable failures?

KEY TALKING POINTS:
- Understanding the major causes and impact of container incidents
- Container safety as a shared responsibility – addressing avoidable risks
- IMO SOLAS container weight verification– crossing the chasm from legislation to implementation
- Cargo packing and securing - good practice and technology to improve outcomes
