

SNW Spring 2010 News Conference Schedule

WHO: Xiotech
WHAT: Media Breakfast
WHEN: Tuesday, April 13th, 7:30 AM – 8:30 AM
WHERE: St. John's 27

Xiotech is pleased to invite media and analysts attending SNW to join them for breakfast on Tuesday, April 13 at 7:30 AM. Jim McDonald, Richie Lary and other senior leaders will be there to recap the beginning of the year for Xiotech, which saw a new management team quickly re-energize and re-focus the company. From defining the new Intelligent Application Storage category and its new corresponding storage architecture to launching new virtualization capabilities, Xiotech has been busy in 2010. In addition, attendees will learn more about additional pieces being launched at SNW and later in the year.

WHO: Consonus
WHAT: Media Briefing and Demonstration
WHEN: Tuesday, April 13th, 11:30 AM*
WHERE: Hands On Lab

Consonus invites members of the press to join senior vice president Daniel Milburn on Tuesday 13 April at SNW's Hands-On-Lab as he reveals details of the newest release of Consonus SAFE™, the SaaS solution for email and file systems archiving, eDiscovery, and Journaling. Powered by Symantec Enterprise Vault™ and hosted and managed at Consonus SAS70 Type II data centers, Consonus SAFE reduces or eliminates capital expense, streamlines data management, and minimizes risk — far more efficiently than traditional archiving methods.

Beginning promptly at 11:30 AM., Mr. Milburn will offer a press briefing and demonstration of Consonus SAFE 2.0. Members of the press will then have a special opportunity for in-depth one-on-one demonstrations from Consonus data storage and archiving experts who will show how this newest release of Consonus SAFE builds on email archiving to automate broader data archiving and to reclaim precious data storage through three key new capabilities:

- **File Systems Archiving:** an automated, integrated archival system that lowers storage costs and allows you to easily manage file lifecycles.
- **Discovery Accelerator:** intuitive, advanced search and analysis functionality, conversation threading, and bulk marking and tagging.
- **Journaling:** copies of all email messages sent and received, ensuring they are kept for the appropriate time period to meet regulatory or legal retention requirements.

*Experts available for in-depth demonstrations and discussion available through 1:00 PM.
