Layers are for cakes:

Rethinking security as a unified system

Dan Schiappa

SVP & General Manager, ESG

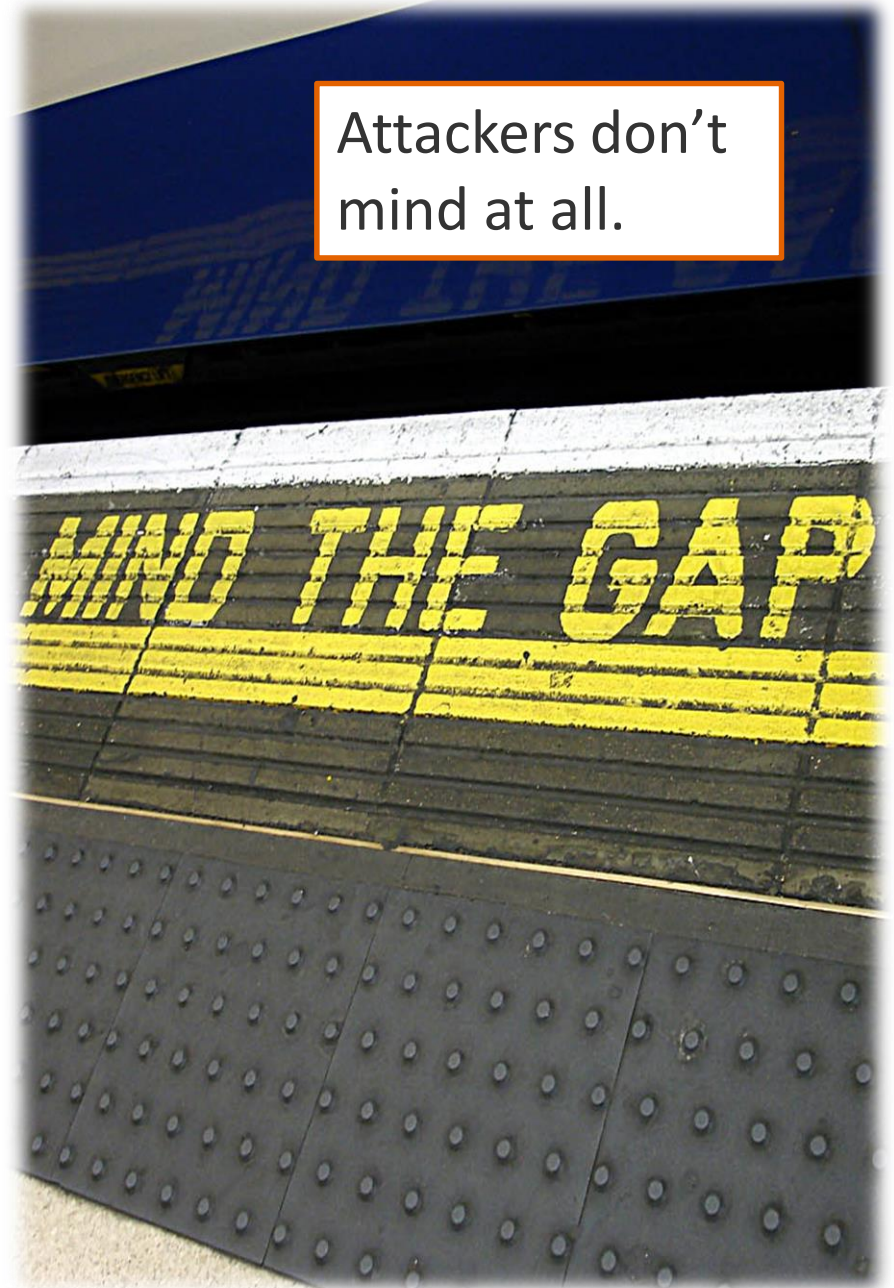

SOPHOS

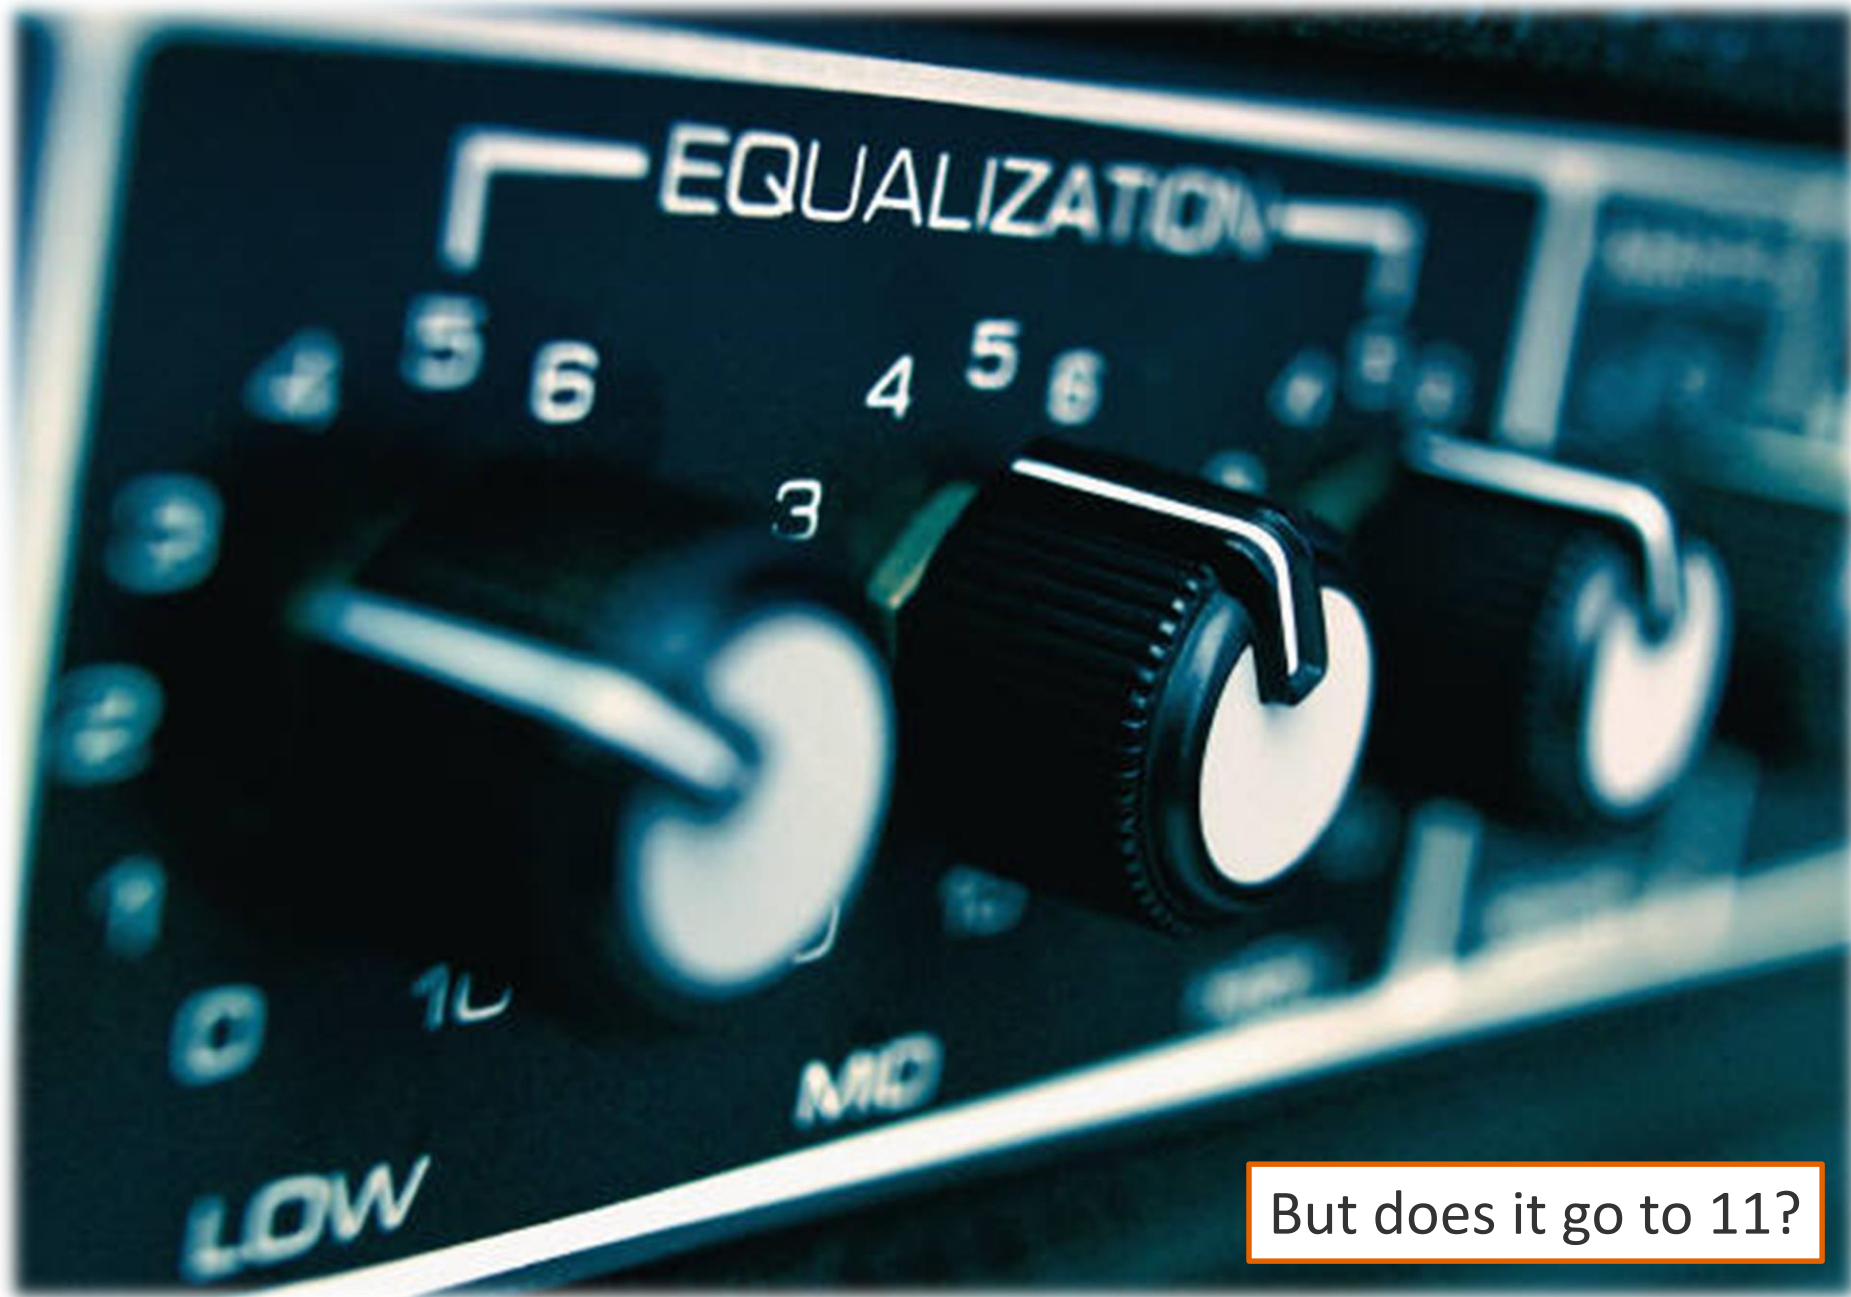

It may not protect you from APTs, but it sure does look good.

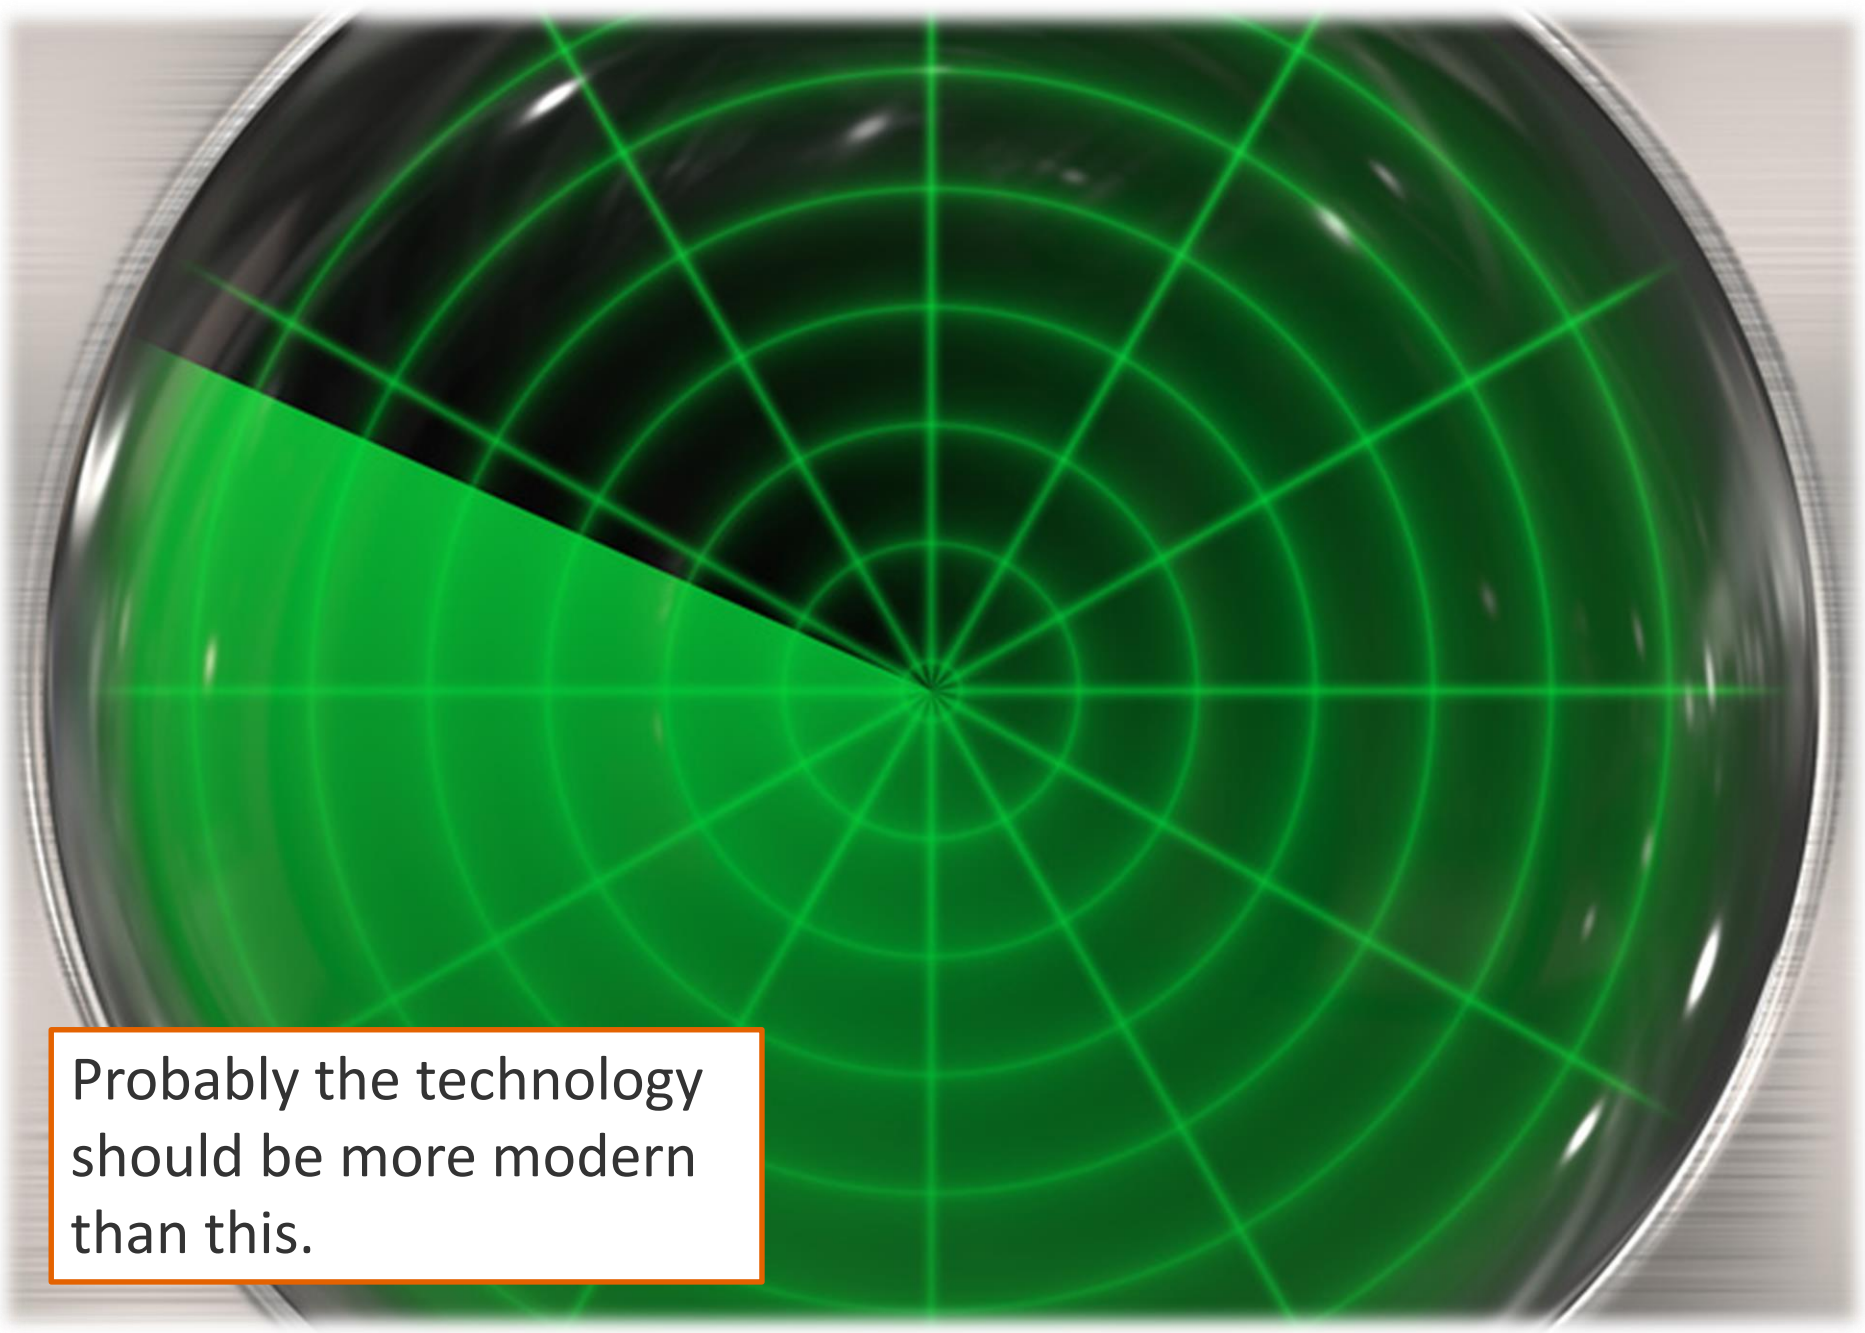

We're going to need
a bigger tree.

Attackers don't
mind at all.

But does it go to 11?

Probably the technology
should be more modern
than this.

Our security research
labs have more beards,
fewer test tubes.

Why do you assume
it's a metaphor?
Sometimes a cloud is
just a cloud.

Bill Belichick, CISO
