ONSITE GUIDE

Dear delegates,

A very warm welcome to HIMSS Europe CIO Summit 2015! On behalf of HIMSS Europe, we are delighted to welcome you for the sixth consecutive year at the annual CIO gathering. It is great to see familiar faces who see the value in our Summit and continue to support us year on year and it is also an honour to see new faces and meet new peers.

We have exciting and current themes lined up for the next couple of days: from Patient Portals to the Future Investments in Healthcare as well as the highly anticipated HIMSS EMRAM (EMR Adoption Model) European update. In addition, our special communities will have their very own track and sessions with the aim to continue to exchange knowledge and learnings within the eHealth Community.

I sincerely hope you benefit from your time at the HIMSS Europe CIO Summit and make the most of our educational programme, networking opportunities and learning from the two Hospital Tours (if you were lucky enough to secure a spot on them!).

A special thank you goes out to the Hospital La Fe, for kindly hosting the event and to Hospital de Denia Marina Salud, for arranging the prestigious Stage 7 Hospital Tours. We are honoured to be celebrating this year's Summit in two of the most digitally mature Hospitals in Europe.

Enjoy the show!

Best regards,
Christina Roosen
VP Public Affairs
HIMSS Europe

HIMSS Analytics EMRAM Awards Ceremony & Dinner

Restaurante Panorama | Marina Real Juan Carlos I, Parking 6. 46011 Valencia
Wednesday, 7 October | 20:30 – midnight

Join the dinner and discover which European hospitals have recently achieved HIMSS EMRAM Stage 6 awards. It's a great chance to meet top leading CIOs from across Europe and learn about new ideas, solutions and best practices happening in neighbouring countries. The Panorama restaurant is on the Mediterranean Sea and boasts beautiful views and a truly delicious gastronomical experience. Enjoy watching the sun set over a glass of wine and in great company!

Seats are limited: if you have not registered for the dinner, please enquire about onsite registration at the main foyer.

Advanced registration and additional fee required (€95.00+ VAT)

Sponsored by HCI Group, HIMSS EMRAM Partner

THE HYPER-CONNECTED PATIENT

New opportunities to manage and prevent chronic diseases

INSPIRE LONG-TERM CHANGE
Use financial incentives and behavior change programs to engage and motivate the patient.

57% willing to use a device if it would lead to lower health insurance premiums¹

40.9% lost interest and stopped using devices when no behavioral change programs were used²

Engage the Patient in the Delivery of Integrated Care
It's more than just devices. It's about:

- Secure access to information needed for the lifetime of the patient
- A patient centered ecosystem relying on end-to-end information management
- An interoperable, agile architecture that is sustainable as technology changes

PREVENT CHRONIC DISEASES AND THEIR COMPLICATIONS

Europe has the highest burden of chronic diseases globally³

- 86% Are caused by
 - diabetes
 - cardiovascular diseases
 - cancer
 - chronic respiratory diseases
 - mental disorders

90% of all deaths in Europe are caused by chronic diseases

70% of Stroke

90% of Type 2 Diabetes

80% of Coronary Heart Disease

Healthy lifestyle practices prevent!

PROMOTE HEALTH THROUGH IMPROVED PATIENT ENGAGEMENT

BY 2017 **5 million** patients worldwide are forecast to be using wearable technology and remote monitoring devices⁴

Patient generated data can be shared with healthcare providers and social networks to:

- Enhance Chronic Disease Management
- Support Healthcare Costs Sustainability
- Reinforce Healthy Lifestyles

1. IDC, Setting On The Chronic Disease Burden In The Hyper-Connected Patient Era, Massachusetts, USA, 19th September, Sept 2014.

2. Forrester, Health, Issue #217, 22 October 2014.

3. Centers for Disease Control and Prevention, Behavioral Risk Factor Surveillance System, Data Collection Oct 2014.

KEYNOTE SPEAKER

7-8 October 2015
Valencia, Spain

José Pedro Almeida

Head of Business & Clinical Intelligence
São João Hospital Center, Portugal

José Pedro Almeida is Head of Business & Clinical Intelligence of São João Hospital Center (#1 in Portugal) since 2011. He has lead the development of an innovative Data Analytics Platform that boosts hospital management and clinical decision. This project has been recognized with numerous national and international awards. In 2014 he was personally awarded the “Professional of the Year” prize by a Rotary Club (Rotary Club International). Recently he was also chosen by the INSEAD Steering

Committee to attend the 2016 INSEAD's Innovation Executive Program in Paris.

How to Leverage Data to Manage and Save Lives? – A Worldwide Award Winning Solution

Wednesday October 7, 10:05 - 10:50, Salón de Actos

José Pedro Almeida will be presenting an international award-winning intelligent clinical decision support system developed at São João Hospital (#1 in Portugal). Almeida has lead São João to achieve 5 awards for the creation

of a revolutionary Big Data Platform in this hospital, that works as a Hospital Information Radar and is able to predict 30% of ICU admissions 7 days before they occur.

FLOOR PLAN

7-8 October 2015
Valencia, Spain

Floor Plan Hospital La Fe

CSC #10

CSC is a global provider of next-generation technology solutions serving public and private sector healthcare clients in the provider, payer and life sciences markets. New models of IT provide a platform for innovative and effective new models of care. With global experience across multiple industries, established expertise and a next-generation technology focus, CSC can work with you to deliver innovation together.

Elsevier #12

Elsevier Clinical Solutions empowers healthcare providers and educates patients, driving the delivery of high quality, economically sound care through world-class clinical content integrated within clinical workflow and EHR systems. Such as: Elsevier's InOrder and CPM-CarePoints.

EMC #6

EMC is a trusted health IT provider serving thousands of healthcare customers worldwide. Our purpose-built enterprise content management solutions and industry leading infrastructure allow healthcare organizations to redefine how they manage and access all forms of clinical content to bring decision support and analytical insights to the point of care—empowering patient-centered care, and helping improve patient outcomes, while setting the foundation for the next era of population health and precision medicine.

everis #11

everis, an NTT DATA Company, is a multinational consulting firm providing business and strategy solutions, application development, maintenance, and outsourcing services. ehCOS is the world class suite of eHealth products developed by everis for the healthcare industry, with a next generation patient-centered EHR at its core that optimizes the exploitation of data to facilitate the medical and administrative decision-making process and increase the safety and quality of care in healthcare organizations. www.ehcos.com

HCI Group #13

The HCI group is a specialized global Healthcare IT consultancy and currently the fastest growing company in the USA healthcare sector as awarded by INC Magazine. Our consultants possess unique expertise in: Epic, Cerner, Allscripts, and McKesson to name a few, as well as advanced skill sets around various service lines.

HIMSS Europe #3

HIMSS Europe is a voice, advisor and thought leader of transformation through health IT. As an independent organisation with innovation at its heart, HIMSS Europe unites and engages key stakeholders across the health and care ecosystem through events, media, analytics and communities that are focused on helping healthcare systems to define their IT strategies meanwhile supporting the healthcare industry to improve its services.

Honeywell #9

Honeywell Sensing and Productivity Solutions is a global leader providing custom-engineered sensors, switches and controls and productivity solutions built around our high performance data collection hardware including rugged mobile computers, voice-enabled software, bar code scanners, radio frequency identification and workflow printing solutions. For more information on Honeywell sensing products, visit <http://sensing.honeywell.com> and on Honeywell productivity solutions visit <http://www.honeywellaidc.com>.

InterSystems #1

InterSystems is the worldwide leader in software for connected healthcare. Our advanced data management, strategic interoperability, healthcare information system, and active analytics platforms enable hospitals and regional or national networks to capture, share, analyse and act upon their data. InterSystems products are used by thousands of hospitals and labs worldwide, including the top 17 hospitals on the Honor Roll of America's Best Hospitals as rated by US News and World Report.

NetApp #2

Leading healthcare organizations worldwide count on NetApp for software, systems and services to manage and store their mission critical data. Customers value our teamwork, expertise and passion for helping them succeed now and into the future. Over 3,500 healthcare organizations worldwide rely on NetApp to enhance the secure exchange of patient information and the integrity of medical records, medical images, and other healthcare data. To learn more visit us at CIO SUMMIT 2015

Qlik #5

Qlik enables healthcare organizations to explore clinical, financial and operational data through visual analytics to discover insights which lead to improvements in care, reduced costs and delivering higher value to patients. More than 1500 healthcare providers rely on Qlik solutions to deliver information to the right people at the right time, supporting and enabling transformation across clinical processes, quality of care, finance and workforce optimization.

Rauland #7

Rauland-Borg is a respected leader in the design and delivery of critical communications, workflow and life-safety solutions for hospitals worldwide. Serving more than one million acute care beds in 40 countries, our Responder® communication and workflow solution helps staff deliver the best possible patient care, with fast, direct patient-to-staff communication, flexible integration, intelligent call routing and real-time reporting. Local service, installation and technical support is delivered 24x7 through our international network of certified system integrators.

T-Systems #8

T-Systems offers small, medium-sized and multinational companies ICT solutions for a complex digital world. In addition to services from the cloud, the range of services is centered around M2M and security solutions, complementary mobile communications and fixed network products, and solutions for virtual collaboration and IT platforms, all of which forms the basis for our customers' digital business models.

Wolters Kluwer #4

UpToDate®, part of Wolters Kluwer, is an evidence-based, physician-authored clinical decision support resource which clinicians trust to make the right point-of-care decisions. More than 6,000 world-renowned physician authors, editors, and peer reviewers use a rigorous editorial process to synthesize the most recent medical information into trusted, evidence-based recommendations that are proven to improve patient care and quality. More than 1 million clinicians in 174 countries and almost 90% of academic medical centers in the United States rely on UpToDate to provide the best care.

Qlik

See your whole healthcare story with Qlik®

As healthcare becomes increasingly digital, analytics can be applied where decisions are needed. Analytics have massive potential to improve quality of care and patient satisfaction while reducing costs. Qlik's associative model empowers clinical, operational and financial users to see the whole story that lives within your data.

Visit qlik.com to see why more than 1500 Healthcare organisations around the world are already benefiting from the Qlik visual analytics platform.
