

HANDS ON GUIDED SURGERY WORKSHOP

DIGITAL WORKFLOW
IN IMPLANT
PLACEMENT

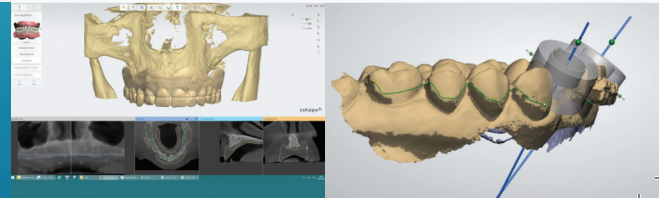

DR. FREDERICK LI

THIS IS A HANDS-ON WORKSHOP
ON THE DIGITAL WORKFLOW FOR
COMPUTER-GUIDED IMPLANT
PLACEMENT AND RESTORATION
IN TODAY'S GENERAL PRACTICE.

Our focus is on users who wish to implement guided surgery into their practice. We will detail the specifics of data acquisition, record taking and secure electronic submission of information through multiple live 3D planning sessions. Design and manufacture of the resulting guide will allow participants to place their own implants using the actual surgical tooling and following the streamlined placement protocols. The workflow of the restorative intra-oral scans using digital scan bodies will take us to the completion of each case scenario.

AVINENT™
Implant System

Dr. Frederick Li graduated from the University of Manitoba College of Dentistry. Desiring to further his dental education and experience, Dr. Li moved to New York City and

completed two years of dental residency in hospital facilities associated with Cornell Medical Center and Columbia University. Dental implantology was a focal component of the post-graduate training, enabling Dr. Li to gain surgical implant experience from some of the top implant surgeons and prosthodontists in the Greater New York Region. Dr. Li is also a graduate of the Misch Implant Institute and was awarded a fellowship by the International Congress of Oral Implantologists. Dr. Li limits his practice to surgical and prosthetic dental implants in Vancouver. He gives courses on a variety of implant topics along with mentoring a large surgical implant study club.
