Biography

John Gallaher has 33 years of experience in the power generation industry. John spend the first 17 years of his career at Peach Bottom Atomic Power Station holding positions in I&C Engineering, Fire Protection, Licensing, Contract Management and Project Management. In 2001, John moved into a corporate role holding positions in Supply Analytics, Decision Support, and most recently, Manager of Inventory and Investment Recovery.

Abstract – Inventory Management

Tuesday Morning's session will cover four topics central to inventory management – Inventory Strategy, Investment Recovery Best Practices, Radio Frequency Identification Systems, the SEER inventory matching initiative, and Counterfeit and Fraudulent Material Detection. These presentations will provide insights and suggestions for improving inventory management processes for both the generation and distribution portions of the utility industry.
