

SWAN Analytical Australia Pacific

SWAN Analytical has been a global leading provider of on-line analytical systems in the water industry. The current product portfolio ranges from ultrapure water (pharmaceutical and semiconductor applications), feedwater, steam and condensate monitoring as well as potable water and industrial water treatment up to swimming pool and sanitary water applications.

The team SWAN Analytical team comprises of engineers, chemists and product support specialists who with precision, reliability and a determination for excellence makes SWAN an ideal partner for you.

All components are in house built out of SWAN Headquarters in Switzerland and undergoes quality control procedures. No instrument leaves with out a final test under real conditions.

We would like to extend our sincere thanks to all our loyal SWAN customers and look forward to fulfilling your future instrumentation needs. Our team in Australia is ready to go and at your service for any product enquiry or technical support issue.
