

BIO
Patricia Billingsley
Pollution Abatement Section, Oil & Gas Conservation Division
Oklahoma Corporation Commission

Patricia Billingsley originated, found grant funding for, and manages the Commission's Brownfields program, fully operational since 2008. Since joining the Commission in 1997, she has overseen the assessment and remediation of brine and/or petroleum impacted oil and gas exploration and production and pipeline spill sites, and drafted much of the Guardian cleanup guidance for petroleum and brine spills. She represents the Commission on many interagency work groups regarding water quality and Clean Water Act issues, and was the lead writer for the Commission's Guardian cleanup guidance and its Water Quality Standards Implementation Plan.

Ms. Billingsley has a B.A. degree in Geology from the University of Maine and an M.S. in environmental Geology from the University of Oklahoma, 1992. Prior to joining the Corporation Commission, she worked for the oil & gas industry in Texas and Oklahoma; as an environmental scientist for the Massachusetts DEP, for an Oklahoma environmental consulting company, and for the Texas TCEQ.
