BUILDING ON STRONG FOUNDATIONS.

Woodside is Australia's largest independent oil and gas company with a proud 60-year history.

Projects like the North West Shelf and Pluto LNG help to meet the demand for cleaner natural gas in Australia and the Asia-Pacific. It hasn't been easy, but we're on an exciting journey to be a leading global oil and gas company.

To achieve this, we always look to do what's right. By doing what's right, even when it's not easy, we can continue to do what's best by our people, our partners, our shareholders and our communities.

Our company's future is built on strong foundations.

Invitation from the APPEA Chief Executive

APPEA 2015 will be staged in Melbourne, which has a long and proud history in oil and gas, and is renowned as being one of the world's most liveable and Australia's most exciting cities.

The APPEA Conference brings together petroleum professionals, industry leaders, investors and policymakers from across Australia and around the world.

It has long been the Australian upstream oil and gas industry's premier annual event.

This is an ideal forum for examining and addressing the opportunities and challenges facing our industry and celebrating its achievements. It is also an important platform for conveying our key messages to policymakers, the media and the general public.

APPEA has once again produced an outstanding three-day conference program. International experts and Australian industry leaders will provide up-to-date analysis, case studies and technical know-how on the big issues facing our industry. Politicians, executives and analysts will discuss the policy challenges facing us.

Welcome to Melbourne

Oil and gas deposits were discovered in Bass Strait in 1965 and within a few years the region was established as a mainstay of Australian energy production.

Today, Bass Strait remains one of Australia's leading petroleum provinces and new fields—such as the recently completed Kipper Tuna Turrum Project—are still being developed.

But Melbourne has much more to offer than strong links with our industry.

The conference venue—the Melbourne Convention and Exhibition Centre—is right in the heart of the city. It is just a 20-minute drive from Melbourne airport and a short stroll to the city centre where APPEA 2015 attendees can explore cafés and restaurants, world-class galleries and museums, lush parklands and enjoy the spectacular athleticism of AFL, Australia's very own code of football, at the world-famous Melbourne Cricket Ground.

A major event

While Melbourne plays host, the conference will review industry trends and activities across the whole of Australia.

Almost \$200 billion of oil and gas projects are currently being built in this country and other major developments are being considered.

With so much activity and growth in the Australian oil and gas industry, APPEA is

expecting more than 3000 attendees and offering a wide range of presentations.

The plenary sessions include both national and international industry experts, and the 24 business/technical sessions will feature almost 90 speakers.

The exhibition area will be one of our largest-ever, covering over 12,000m², hosting more than 180 companies and including spacious networking lounges, full catering facilities, charge zones and a technology and business centre.

APPEA could not stage an event of this scale and quality without the support of sponsors. We thank our principal sponsors—**Clough** and **Woodside**. Woodside is a global leader in LNG and a significant player in the production of oil, condensate and domestic gas. Clough is a leading Australasian oil and gas contractor offering a full-project lifecycle service. Their support—and the support of our other sponsors—is essential to the success of this event.

APPEA 2015 promises to be a landmark conference with a number of massive LNG developments completing construction and commencing operations. I look forward to seeing you in May 2015 at the Melbourne Convention and Exhibition Centre.

20 APPEA 2015 TECHNICAL PROGRAM AWARDS

A call for volunteer judges

APPEA 2014 Award Winners

Below (left to right):

The 'Alan Prince' Award for Best Peer Reviewed Paper published in the *APPEA Journal*: Award accepted by Tim Stephens (Senex Energy)

The Best Extended Abstract published in the 2014 APPEA Conference Proceedings: Award accepted by Megan Lech (Geoscience Australia)

The Best Oral Presentation:
Andrew Long (PGS)

The Best Poster Presentation: Holger Kelle (INTECSEA Pty Ltd)

Would you like to be a volunteer judge for APPEA 2015?

At the end of each annual conference, APPEA presents four prestigious awards relating to the Technical and Business Program.

Two awards covering the written element of the presentations are judged by the Technical Program Committee. These are:

- the 'Alan Prince' Award for Best Peer Reviewed Paper published in the *APPEA Journal*
- the Best Extended Abstract published in the APPEA Conference Proceedings.

Two awards presented that cover the communication element of the presentation are:

- the Best Oral Presentation at the APPEA Conference
- the Best Poster Presentation at the APPEA Conference.

With over 80 oral presentations and 60 poster presentations to judge, APPEA is calling for volunteers to assist with the judging process.

Please be assured that you do not have to be an 'expert' in the field of the presentation. You will be judging the presenter's ability to communicate his or her message (rather than the content of the message).

If you would like to assist in judging you will be asked two questions during the online registration process:

- What session(s) you will be attending and if you would like to act as a judge
- Your email and mobile contact details—so we can distribute the judging forms ahead of the conference and contact you during the conference.

If you have any questions about this aspect of the APPEA Conference, please feel free to contact Dr Steve Mackie, Chairman of the APPEA Technical Program Committee—steve.mackie@santos.com.
