

A personal conclusion

Christian Raetzke

We strongly favor standardization!

Stoiber

Cooperation and harmonisation: a “Pragmatic Dream”

- Vision shared by all
 - industry: standardisation, predictability, stability
 - regulators: effectiveness, efficiency
- Awareness of obstacles and detriments

Selective / incremental approach

- Different aspects of licensing
- Feasible steps (e.g. not diluting regulatory responsibility)
- Utilise expertise of engineers and lawyers
- SMRs/advanced designs

Cooperation of parties during licensing

A lot is already being done

The common search for options and solutions should continue
