Biography

Dan Mikow is the Senior Principal Electrical Engineer / Curtiss-Wright Technical Fellow in the EQ/Seismic department of Curtiss-Wright Nuclear Division, Cincinnati Operations. Dan has worked as an Electrical Engineer in the electrical utility industry for over 36 years, initially as an electrical distribution engineer, and then as a startup engineer, technical staff engineer, and consultant in various nuclear power plants. Dan has been actively employed in the areas of EQ, seismic testing and commercial grade dedication for the last 27 of those years. During this time, Dan has conducted and directed many seismic and harsh environmental qualification programs, as Project Manager, Test Laboratory Manager, Chief Engineer and Suitability Analyst, the last two positions while working in Germany. Dan is a member of the IEEE Subcommittee on Qualification (SC-2), and is an active member of several Working Groups of the Subcommittee.
