Biography

Mike Barnes is the Material Control Supervisor at Wolf Creek Nuclear Generating Station. He has 40 years of Supply Chain experience in Material Control, Inventory Management and Warehousing. Mike has been heavily involved with RAPID, the yearly conferences and multiple inter-utility initiatives and projects since the 1990's.

Abstract – NSCSL – ICES

This presentation will be a high-level look at a new NSCSL sub team, which was developed to address, validate and monitor INPO ICES reports. The discussions will include topics such as ICES Events, Engineering Bubble Charts, ICES coordinators and supply chains impact and involvement in these processes. We will also talk about actions the sub team is taking immediately and in the future to assure the industry Supply Chain Managers are aligned with actions required to support these topics.
