

Water, Pumps, Energy & Digitization

Rasmus Blom

Director
Grundfos Connect

ICN Summit Copenhagen
21 MAY 2014

THE LINK

ENERGY RESOURCES

is required mainly for the provision of
WATER SERVICES

-

WATER RESOURCES

are required in the
PRODUCTION OF ENERGY.

(UN WWDR 2014)

HETEROGENOUS

ENERGY is in USD \$ trillions
WATER is in USD \$ billions

ENERGY is globally traded and can
be transported easily – not like
WATER

WATER distribution is locally or
regional managed, ENERGY is
national or international

DIGITIZATION

Long term:

Can bring transparency needed
to optimize water/energy at
ecosystem level

Today:

Harvest the low hanging
efficiency fruits and look beyond
for collaboration

Thank you,

join us on

Gatesense

Co-creating IoT platform for a sustainable world
