

Robert (Bob) Craig

Automation Leader at Devon Canada Corporation

Robert Craig has been leading Devon's Automation group since 2009 where his skills in instrumentation, process improvement and team leadership are an ongoing excellent asset at the company's flagship steam-assisted gravity drainage (SAGD) operation in northern Alberta.

Robert started his career as a Control Systems Engineer on Talisman's Sudan oil facilities project where he specialized in process control and safety systems in operations. He also worked on several projects for the Sudan asset in Dubai, Finland, Germany and Kuala Lumpur for eight years. Previous to this role, Bob worked as an Automation Lead at CS Automation for the following two years.
