

Agenda - Art of the Possible, Perth November 10th

Time	Topic
10:45	Registration, Morning Tea, The Zone
11:15	Welcome to Art of the Possible Nicole O'Connor, WA State Manager, SAP Australia & New Zealand
11:25	Preparing to become a Digital Organisation John Rynbout, Director Digital & Mobile Solutions, SA Power Networks <i>In the digital economy, expectations are drastically changing. To meet these new demands SA Power Networks recognised the need to be on platform providing consistent and real-time data across their operations. Hear how their IT team are using SAP technology to foster innovation to become a true business enabler.</i>
11:55	Implementing the Art of the Possible in the Real World Rebecca Kerr, General Manager of Technology and Mike Lomman, GM – Demand Chain, Roy Hill <i>At the heart of the Roy Hill mining operation is a state of the art remote operations center that is pushing the boundaries of technology. The fundamental philosophy is to leverage technology that supports end-to-end integration of both process and data. This integrated digital capability allows Roy Hill to leverage IoT scenarios and advanced analytics to drive further efficiencies throughout the life of mine operations. Digitisation makes communication easier, while automation helps drive consistency, efficiency and improves safety. Drones, robots and immersive training simulators are “run of the mill” technologies, while 3D simulation and visualization of mine plans are on the cards for further development. In order to continue to push the boundaries of technology Roy Hill is promoting a culture of industry co-innovation by building an ecosystem of partners keen to work together to bring new insights and solutions that have not yet been thought of.</i>
12:25	Introducing The Experience Zone and Journey Hub <i>Hear how you can interact with technology showcases in The Experience Zone, such as the SAP Digital Boardroom, IoT, HANA Cloud Platform, OT/IT integration with OSI, condition based maintenance with Hitachi Data systems and Esri Location Analytics. You will also have an opportunity to collaborate with SAP experts at The Journey Hub to identify your business’s digital road map and find out how you can get started.</i>
12:35	The Experience Zone and Journey Hub Lunch
13:00	The Power of Digital in a changing world Anton Kroger, Industry Value Engineering Lead, SAP Australia & New Zealand <i>Digital transformation takes on many forms, connecting businesses with customers, employee’s suppliers and machines. In this session, Anton Kroger will share insights on how organizations across Australia and New Zealand are approaching digital business transformation following our local research with CIO Magazine, as well as findings from the recently released Australian Digital Experience Report which investigates the correlation between digital experience and business outcomes.</i>
13:35	Building a new Talent Model from the ground up with an agile Cloud Development Platform Sandy Eastman, Founder, Approach Solutions <i>In the Cloud we build differently, we design, build, test for usability, throw away, rebuild until we have a solution that is technically sound, with great usability and easy to support. See how SAP HANA Cloud Platform has enabled IT start-up Approach Solutions to create an easy to use HR application with a graphical, intuitive user interface that appeals to all users and enables in-the-moment decision making.</i>
14:00	The Experience Zone (10 mins)
14:10	Dig up value from your Connected Assets with new IoT Innovations Lars Breddemann, SAP Australia & New Zealand <i>Experience real world IoT examples and hear more about Predictive Asset Management projects across different industries including Utilities, Logistics and Farming.</i>
	Public Sector Focused Session: The Digital Nudge Kylie Watson, Business Transformation Consultant SAP Institute of Digital Government <i>The concept of nudge from the field of behavioural economics has sparked government initiatives that have yielded significant value. By introducing digital to the equation, nudges can become targeted to individual circumstances which potentially increases their effectiveness. Kylie is an award winning innovator and communicator on top of being a digital Sociologist. She will outline nudge theory and its application to Government.</i>

Agenda - Art of the Possible, Perth November 10th

|-------|---|--|
| 14:40 | Bridging the World of IT and OT with the SAP HANA IoT Integrator Solution
John Bradley, Strategic Alliances
OSIsoft APAC
<i>SAP and OSIsoft have developed the "SAP HANA IoT Integrator solution by OSIsoft" to deliver on the promise of integrating the OSIsoft Plant Information (PI) System with the SAP HANA environment. This session will highlight the challenges involved in IT/OT integration and reference a case study at Power Generation company "EDF Renewable Energy" to highlight what can be achieved from the convergence of IT and operations data via OSIsoft PI operational data with Esri geospatial mapping and SAP HANA as the enterprise data platform.</i> | Public Sector Focused Session: Technology enabling Public Safety
Hitachi Data Systems
<i>See how technology is being deployed in South Africa for public safety with a state of the art system detecting crime in real time.</i> |
| 15.10 | Augment your Business Systems to Capitalise on Location Intelligence
Francisco Urbina, Manager - Alliances & Partners
Esri Australia
<i>Hear how simplified access and use of location data in SAP HANA provides powerful, transactional spatial data creation and editing capabilities to support real-time operational and analytic applications, opening a broad new range of use cases and workflows.</i> | The IoT User Experience – Tangible Innovation made Visible
Dr. Nicolas Nicoloudis, SAP Australia & New Zealand
<i>In this session, see how SAP's current UX using Fiori and Visual Enterprise can effectively monitor and manage connected assets. We will also share insights on how we are investigating Virtual Reality to visualise numerous sensors to capture and display data.</i> |
| 15:40 | Reimagine Analytics to drive Digital Transformation across your Business
Mark Barry, Analytics and Innovation
SAP Australia & New Zealand
<i>Discover how you can help your company thrive, not just survive in the digital economy, through the power of analytics.</i> | The IoT Innovation Platform – Building Apps with ease
Dr. Nicolas Nicoloudis, Custom Development
SAP Australia & New Zealand and Jamie Gilbert, JAF Solutions
<i>Discover how you can integrate your IoT devices into SAP HANA Cloud Platform and see firsthand some of the IoT Innovations we have developed locally such as the enchanted paint bucket and beer keg.</i> |
