Non-RPMS EHR Systems
Meaningful Use

**Standards**

Codes that are used by everyone
- SNOMED for diagnosis and problems
- LOINC for lab and radiology
- RxNORM for medications

**Interoperability**

Ability to share information from one system to another
Example

- Document that the patient has a diagnosis of Type 2 Diabetes
  - Your EHR assigns the appropriate SNOMED code
Diabetes Audit

The IHS Diabetes Care and Outcomes Audit

The IHS Diabetes Care and Outcomes Audit is a process to assess care and health outcomes for American Indians and Alaska Natives with diagnosed diabetes. IHS Tribal and Urban Indian health care facilities nationwide participate in this process each year by auditing medical records for their patients with diabetes.

Click on the link below or left hand menu to find information about different Audit topics. If you have questions or need further information, contact the Audit team.
