Biography

Marc Tannenbaum is a project manager at the Electric Power Research Institute (EPRI) responsible for EPRI's Joint Utility Task Group on procurement engineering as well as technical procurement-related projects addressing issues such as obsolescence, quality of procured items, counterfeiting, and commercial grade item dedication. Mr. Tannenbaum is a member of the ASME NQA-1 Engineering and Procurement Processes Subcommittee, the Nuclear Supply Chain Strategic Leadership (NSCSL) Executive Committee, and the Nuclear Utility Obsolescence Group (NUOG) Steering Committee. Marc is currently working on relay testing guidance; computer based training for obsolescence program managers, and updated commercial grade item dedication guidance. He is a member of the NEI teams responding to the NRC's concerns with counterfeit and fraudulent items and 10CFR, Part 21 rulemaking effort.

Abstract – EPRI/JUTG Update

This presentation will discuss and provide an update on EPRI projects in the area of technical supply chain and procurement engineering including research on commercial grade dedication, obsolescence and procurement engineering training, and equivalency evaluation for digital devices. The regulatory status of recently released guidance on counterfeit and fraudulent items and computer program dedication will also be discussed.
