EZMaxMobile

Brad Tapley

What is EZMaxMobile?

EZMaxMobile is an application that can be placed on a mobile device that allows access to inventory and other functions within the Maximo application.

Application works for Apple, Windows and Droid platforms.

Users can be anywhere with a cell signal to utilize the application.

Types Of Devices Deployed

Southern Nuclear is using EZMaxMobile

- Utilizing Apple and Windows Surface Pro Device
- Using to approve PR's and attach photos to records

Fossil Hydro has implemented EZMaxMobile

- 80 Devices (Apple and Droid Base)
- Apple devices are more user friendly over Android
- Apple users are able to use AnyConnect vs RSA Token to login
- Apple devices scan bar codes faster
- Syncs with WIFI

EZMaxMobile Application

Benefits of this mobile application

- Wall to Wall audits easily and quickly performed with barcode scan
- Random Inventory counts are being performed more often
- Apple iPhone owners also loading EZMaxMobile on their phones
- Apple iPhone owners are now using their phones to review and approve PRs from anywhere
- Buyers will have the ability to issue a Purchase Order from a mobile device which helps improve work life balance.

Performing Inventory Counts

Application will allow Inventory Counts to be performed both online and offline based on WiFi or mobile device signals.

Bar Code Scanning

EZMax Mobile provides the functionality to scan labels or UPC codes associated with materials to quickly access material information.

Records can be updated quickly and accurately reducing any chance for human error associated with manually entered item numbers.

EZMaxMobile Benefits

We expect to gain some efficiencies with inventory counts by automating manual inputs.

We expect to improve customer service by being able to rapidly move a purchase requisition thru the approval process.

We expect this tool will help modernize our warehousing process by giving associates a tool for a device they are already comfortable with.

We expect this application will help our inventory clean up efforts.

EZMaxMobile Limitations

EZMaxMobile does have some limitations and is not intended to replace the desktop version of Maximo. Some of the limitations are listed below.

- Cannot generate new items within the application
- Cannot create or review exception notifications
- Currently cannot create a Purchase Order within the application but this functionality is in the works.
