

# Simplifying your Daily Cleaning Process with Five Chemicals

---

# Five Products

---

# Neutral Floor Cleaner

---

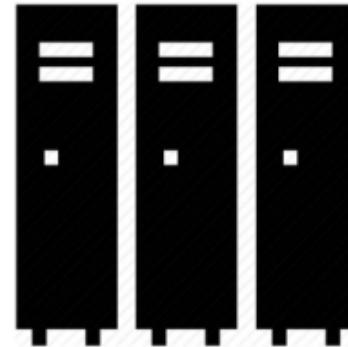

- Typically we spend 60% of our time cleaning the floor area.
- Alberta climate can make it difficult to maintain floors
  
- Neutral floor cleaner can be used effectively, with the exception of washrooms, locker rooms, and pool decks
- This product can be used in either a damp mop application or through an auto scrubber

# Disinfectant Cleaner

---

- Areas of high concern

- Ideal to use the same disinfectant for wiping and high contact areas (door handles, towel dispensers, exterior of toilets/urinals)
- Can also be used to clean floors in washrooms and locker rooms

# Glass Cleaner

---

- Clean, translucent glass will leave a good first impression for guests who enter your building

- Dirty, fingerprinted glass will subconsciously tell your customer that the washroom and locker rooms are not clean
- First impressions do count

# Mild Acid Cleaner/Descaler

---

- Running water will tend to create a build up of inorganic material such as, iron, calcium etc.
- Mild acid is used to clean inside of fixtures. Ex. Urinals
- Mild acid cleaner can also be used on a monthly basis for maintaining shower room walls and floors

# Degreaser/Deep Cleaner

---

- Deep cleaner is used to clean greasy deposits that are left overtime Ex. Shower room
- Body oils and soap scum typically build up on the tiles after a week in the shower area
- Recommend the D-Limonene based cleaner, which is a natural solvent
- For surfaces that require more alkalinity, a well diluted degreaser/cleaner would work best

Product	Surfaces to be Cleaned
<b>Neutral Floor Cleaner</b>	Resilient Floors, concrete, running tracks, arena seating, arena floors.
<b>Disinfectant</b>	Washrooms, Locker rooms, shower and pool decks. High contact touch surfaces in washrooms and throughout the building.
<b>Glass Cleaner</b>	Glass, mirrors, chrome.
<b>Mild Acid Descaler</b>	Shower walls, urinals, anywhere hard water deposits form.
<b>Mild Based Citrus Degreaser</b>	Shower rooms, deep scrubbing, weight room floors, running tracks.

# Conclusion

---

- Training safety and ease-of-use in the commercial cleaning industry is the foundation of any cleaning program
- Creating a training program on how to effectively use these 5 products will ensure cleaning procedures will be completed in a timely and effective manner
- Having 20 or more cleaning chemicals in your custodian room will lead to confusion and endless safety training
- “Less is more”

Thank you!
