

Scale Business Solutions with Nuage Networks Deployment Planning Services

Scaling a business solution from proof-of-concept to an enterprise-wide deployment requires experience, foresight and broad knowledge of the business and technology domains at play.

Deployment planning helps enterprises scale their business solution while maximizing return on investment (ROI).

Overview

Solutions from Nuage Networks™ are primarily viewed as a technology investment. However, when the broader business buys into a deployment plan and signs off on the risks and rewards, Nuage Networks solutions provide higher returns and can scale to become enterprise-wide solutions.

Nuage Networks provides enterprises with a deployment planning team that takes into account all of the planning considerations needed to meet business requirements:

- New service growth
- Migration roadmap
- Operations and process change
- Cultural adoption
- Benefits tracking

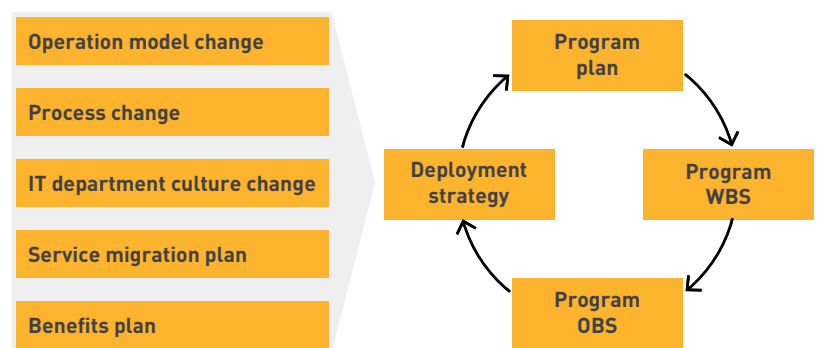

Nuage Networks Deployment Planning Services enable Nuage Networks solutions to scale with IT and datacenter investments.

Key deliverables

- Program scope
- Migration schedule
- Operations change schedule
- Cultural evolution plan
- Benefits delivery plan

Components

Nuage Networks Deployment Planning Services combine all technical and business services into a holistic program for managing enterprise-wide deployment of the Nuage Networks solution.

Benefits

- **Reduce time:** Deliver sound deployment planning to help ensure the fastest path to achieving stakeholder approval for full-scale deployment.
- **Maximize returns:** Identify and set stakeholder expectations, document benefits and quantify expected returns before deployment planning begins.
- **Reduce risks:** Consolidate all of the input from other work teams into a coordinated program with centralized management.
- **Increase control:** Use a single point of control, and a single channel of management status, reporting and tracking to give stakeholders a single point of accountability for delivery.
