

POSTER #13 - Reducing Medication Incidents: A Coordinated Reporting and Analysis Process

Wil McClennen, James Easterbrook, Nancy Solomon, Joanne Roberts, Stephana Hung, Carla Beaton, Fred Bruns

Medical Pharmacies Group Ltd, Markham, Ontario, Canada.

DESCRIPTION:

Reducing medication incidents requires complete and comprehensive reporting of multiple events to support trending and root cause analysis. This presentation outlines a solution for getting analyzable data that we have developed, piloted, and are preparing to scale. It overcomes hurdles related to privacy of personal health information, wide technology and process variations across hundreds of homes, and data requirements for effective root cause analysis.
